FLORA AND FAUNA
WITHIN THIRTY MILES OF
HANOVER, N. H.
A CATALOGUE

OF THE

FLOWERING PLANTS

AND

HIGHER CRYPTOGRAMS,

Both Native and Introduced, found within about thirty miles of Hanover, N. H., including a few Cultivated Species, to which is appended

A List of Vertebrate Animals of the Same Region.

BY

HENRY G. JESUP, A.M.,

Professor of Natural History.

PRINTED FOR THE AUTHOR.
1891.
Directions for Collecting and Preserving Plants and for the Formation of an Herbarium.

1. A complete specimen will represent the root, stem, leaves, flowers, and fruit.
2. Collect small plants, like the Violet, entire.
3. When the leaves of the stem and the root differ, as in some Buttercups, get both.
4. If the staminate and the pistillate flowers are on different plants, as in Thalictrum (Rue), or on different parts of the same plant, as in the Butternut, look for both.
5. Plants of the Mustard Family (Cruciferae) and the Parsley Family (Umbelliferae), with all Rushes and Sedges, are classified by the fruit. Grasses may be gathered in flower.
6. Ferns should be in fruit, and when the sterile and fertile fronds differ, as in Osmunda, get both.
7. Thick roots and stems can be split in two, and one half only be preserved.
8. Arrange the plant to be dried in a folded sheet of thin, bibulous paper, and do not disturb it until dry. Let thick pads of drying paper alternate with these single sheets, and then place the whole under pressure. Change the drying pads every day or two, and dry as rapidly as practicable.
9. These dried plants attached to sheets of paper by strips of surgeon's plaster or by glue, fully ticketed with name, when and where and by whom collected, and arranged in Orders and Genera as in the Manual, constitute an Herbarium.

Summary of Species.

PREFACE.

The following Catalogue is intended to include, so far as known, the Flora within about thirty miles radius of the town of Hanover, New Hampshire, a circuit extending to and embracing the mountain peaks Moosilauke and Kearsarge in New Hampshire, and Killington in Vermont. The outlying towns intersected by the circumference of the circle, beginning with the southern limit and the Connecticut river, are, in New Hampshire, Charlestown, Acworth, Lempster, Goshen, Newbury, Sutton, Andover, Hill, New Hampton, Bristol, Bridgewater, Plymouth, Campton, Ellsworth, Benton, and Haverhill. Continuing the circuit on the Vermont side of the river, the towns are Newbury, Topsham, Orange, Williamstown, Brookfield, Braintree, Rochester, Pittsfield, Chittenden, Mendon, Shrewsbury, Mt. Holly, Ludlow, Chester, and Springfield. The region thus indicated is divided nearly equally between the two adjoining states by their common boundary the Connecticut river, and includes a variety of soil, climate, and location sufficient to furnish a home for a majority of the plants of northern New England, except those peculiar to the seashore and the higher mountains.

The only river of any considerable size is the Connecticut, running from north to south throughout the entire district, a distance of sixty miles or more. Numerous tributaries join this river on both sides, the largest of which, in Vermont, are the Ompompanoosuc which empties in Norwich, the White river at White River Junction, the Ottoquechee in Hartland, a few miles from whose mouth is the deep gorge known as "Quechee Gulf," and the Black river in Springfield. In New Hampshire, the Mascoma, the outlet of Mascoma Lake, joins the Connecticut in West Lebanon, and the Sugar river in Claremont. The Pemigewasset and other streams which form the head waters of the Merrimack river, moreover, reach some towns in the eastern part of the district.

The larger sheets of water included are, in New Hampshire, Sunapee lake, Newfound lake, and Mascoma lake, or Enfield pond. Sunapee lake, in the towns of Sunapee, Newbury, and New London, is about seven miles long, and at one point two and one half miles broad, and is a well known summer resort. Newfound lake in the towns of Hebron, Bridgewater, and Bristol, is less known, but is a fine sheet of water, six miles perhaps in length, and three miles in extreme breadth, and very nearly as large as Sunapee. Mascoma lake or Enfield pond is somewhat smaller, being four and a half miles long by rather more than half a mile in width.

On the Vermont side there is little to correspond with the above. Fairlee pond or Morey lake in the town of Fairlee, and Fairlee lake, partly in the same town, are both comparatively small. The purity of the water in these larger lakes, and their commonly bold or gravelly shores, are not favorable to the accumulation of much aquatic vegetation, but even here the botanist will
find some plants, like Bidens Beckii (Water Marigold) for instance, not found elsewhere, and all these lakes will repay exploration. It is the smaller ponds and adjoining marshes, rich with decaying vegetation, that more abundantly reward the persevering herbalist. Of these, also, there are more on the eastern side of the Connecticut river than on the western side. Not a few of them are high up among the hills, visited very seldom and by very few, but in these high and cool bogs there still is found the remains of a vegetation that long since deserted the warmer lowlands. Here are the rarer Sedges and Grasses, Sarracenia (Pitcher Plant), and Orchids, besides Ericaceous plants like Azalea, Rhodora, Andromeda, and Ledum (Labrador Tea), as well as others of equal interest. Periods of drought seldom reach these rich and moist garden spots.

Of the three mountain peaks referred to above, Moosilauke in Benton, N. H., 4,811 ft. in altitude, is the only one having a treeless summit of any considerable extent, suggestive of Alpine plants, and there a few species appear, such as Arenaria Groenlandica (Mountain Sandwort), Loiseleuria procumbens (Alpine Azalea), Vaccinium Vitis-idaea (Mountain Cranberry), Vaccinium uliginosum (Bog Bilberry), and Solidago alpina (Alpine Golden-rodd), etc. Kearsarge Mt. near Salisbury, N. H., and Killington Mt., with the adjoining peaks in Sherburne and Mendon, Vt., are well wooded nearly to their summits, and have upon them little or nothing strictly alpine. The same is true of Mt. Ascutney near Windsor, Vt., and the same may be said of Cube Mt. in Orford, and Smart's Mt. in Lyme, N. H. This latter elevation is peculiar in this, that the timber on the summit, instead of being stunted and worthless, is of full marketable size. Cardigan Mt. in Orange, N. H., has a conspicuous treeless summit, but little truly Alpine, unless we except Vaccinium Vitis-Idaea, has been reported from there. It is probable that a more careful exploration might result in some new discoveries on any or all of these mountains.

In addition to the lakes and mountains, numerous streams are found within the district on whose banks and in whose waters are forms of vegetation peculiar to such localities and to them alone. Rivers like the Connecticut, with numerous tributaries, are great highways for the distribution of both seeds and growing plants. Every freshet bears these along in its swift current, and transports them many miles from the place of their origin. They are stranded on the shore, or find a home in the still pools along the margin of the stream, and once established may remain indefinitely. This explains the presence of Astragalus alpinus (Alpine-Vetch) on the rocks at Summer's Falls in Plainfield, N. H.—a plant of the far north—together with Astragalus Robbinsii, a species of equal interest. When, moreover, the river recedes during a period of drought, the shore that is laid bare supplies conditions under which a still different vegetation makes its appearance. Kamnmlus Flammula, var. reptans (Creeping Buttercup) then spreads its green carpet dotted with yellow stars upon the sand; and other plants, that are shut out of their needed supply of oxygen by high water, begin once more to flourish.

Plants are as migratory as any other of the world's inhabitants. They are always ready to make use of the same great thoroughfares and of the same
means of transportation. Every new railroad or canal or highway opens for
them a direct line of communication with regions not yet visited, and they in-
stantly make use of them all. Every steamship or sailing vessel, whether
from across the ocean or coasting along our own shores, aids in the distribu-
tion, while all these and similar agencies are but supplementary to those
which, entirely apart from civilization, are in constant operation.

The early inhabitants of New England had scarcely landed on our shores
before they found that the Ox-eye Daisy and the Dandelion, together with
the Buttercups and Docks and Plantains and a score of similar emigrants
from the old world, had accompanied them. And when the tide of travel
advanced westward toward the Mississippi river, not only did these same
plants follow the same route, but in due time the plants of the prairie, like
*Rudbeckia hirta* (Yellow Daisy or Cone-flower) began to appear in Eastern
meadows. These introduced plants are sometimes of great value, like the
Grasses and Clovers, but commonly they are the so called weeds of the farm
and the garden, and come unbidden and unwelcome. Some come to stay,
others that appear occasionally about our manufacturing establishments, per-
sist for a time only, but finally disappear to be followed very likely by a new
importation. Plants of this kind are in some respects more interesting than
those of our native Flora, not only because we come more directly in contact
with them, but because each has a history behind it and around it, which serves
to illustrate the beginnings and the development of that portion of the country
where it has found a new home.

The fields and open woodlands, the roadsides and fence rows, are naturally
first visited by the plant collector because easily accessible, but every nook
and corner, whether in sunshine or in shade, in its season, has its own share
of vegetable as well as animal life, and the lover of Nature who would become
thoroughly acquainted with her treasures seeks them everywhere, for the
simple reason that they may be found everywhere. The Flora of no section
of our country will ever be known so completely that nothing more shall
remain to be learned about it. No surprising discoveries of new species may
be made, though of this we dare not be too sure, but new chapters in the history
of well known plants may be opened, newly arrived immigrants noted, new
varieties found, new facts as to distribution and new economical uses as-
certained, as well as new relations between the species and its environment
in illustration of the conflict all plants are making successfully or unsuccess-
fully for an existence. For reasons like these a region which has been
as long settled and is as well known as the one embraced in this Catalogue
will never be without interest to the naturalist.

The relation of what is here called the Hanover Flora to the general New
England Flora calls for some brief notice. Thirty miles south of Hanover, in
the towns of Charlestown, N. H., and Springfield, Vt., some of the trees and
shrubs so common a little farther south in both of these states have already
reached their northern limit, and begin to disappear from the native woods.
The Chestnut and the Shagbark Hickory are no longer abundant. The sea-
son is too short for any considerable quantity of fruit to reach perfection, and
seedlings are rare. Trees of these two kinds when planted in sheltered localities
may attain considerable age and size. A single chestnut of exceptional size may be seen in Norwich, Vt., five feet eight inches in diameter, and more than fifty years old, but it was planted where it now stands, and the chestnuts are of little value. An occasional Shagbark Hickory of moderate size may also be met with, though the Pignut Hickory is not infrequent in the woods, and the Bitternut Hickory ascends the Connecticut as far north as Wells river. The Black Birch, and the Grey Birch, as well as the Pitch Pine, are rare north of Hanover and not common in its vicinity, while the Sycamore or Buttonwood is nowhere seen in a wild state. To the above may be added as decidedly rare, the Sassafras, the Spice Bush (Lindera), the Flowering Dogwood (Cornus florida), the Red Cedar, and the common Juniper, together with many other trees and shrubs that fifty miles south of Hanover may be common.

On the other hand, as the traveller advances thirty miles northward from Hanover, another class of aborescent vegetation appears, that either is not found at all southward, or at least is not abundant. Here the White Cedar becomes plentiful and very valuable, the Tamarack or American Larch fills the swamps, and the White Spruce occasionally appears, while the Black Spruce covers the lower mountain tops, the Paper Birch adorns the hillside, the Green Alder is found by the streams and in the ravines, and the Elder has red berries more commonly than black ones. Additional illustrations might readily be given, but the above will indicate what changes may be noted within sixty miles only of latitude.

The first and preliminary edition of this Catalogue was issued in 1882. Since that time some additional explorations of the region have been made, very much increasing the list of names and supplying much valuable information.

In order to make the Catalogue as useful as possible to the author's classes in Natural History, for whom primarily it has been prepared, there have been added the names of such plants as are most commonly met with in cultivation, arranged under their respective Orders. These do not properly belong to the Flora, and are distinguished from the rest either by the arrangement of the type or by being enclosed in square brackets. Their description will be found in Gray's Field, Forest, and Garden Botany, while the description of plants belonging to the Flora proper will be found in Gray's Manual of the Botany of the Northern United States, Sixth Edition, 1890. The synonyms refer to the fifth edition of the same Manual. The names of introduced and cultivated species are printed in small capitals. The local or English name of each plant has been added so far as known. And as an additional aid to the student, brief directions have been given for collecting and preserving plants and for the formation of an Herbarium. Localities not designated are in New Hampshire.

In the preparation of the previous edition of the Flora, free use was made of a Catalogue of New Hampshire plants compiled for the Geological Survey of the State by Wm. F. Flint, and a large amount of information and personal assistance was contributed by Nathan Barrows, M. D., then of Meriden. From the Vermont side of the Connecticut river some rare species were
reported from North Pomfret by Prof. A. P. Morgan; from Sharon by E. K. Baxter, M. D.; and from Union Village by Ferdinand Blanchard, M. D.; while Mt. Ascutney and the vicinity of Windsor were thoroughly explored by George H. Leland.

For the present edition it has been found necessary to rewrite and rearrange a large part of the Flora to correspond with the changes in both classification and nomenclature found in the last edition of the Manual referred to above. As the work has been in progress, important aid has generously been furnished by the author's numerous friends and correspondents in various parts of the country—too numerous to be mentioned individually—and he would here convey to them his hearty thanks. The students who year by year have been connected with his classes have done their share also in bringing this Flora to its present completeness. The names of very many of these contributors, both correspondents and students, will be found in their appropriate places in the following pages.

The List of Vertebrate Animals found within the same district as the Flora, originally given in the edition of 1882, was prepared by Prof. T. W. D. Worthen, with the assistance of Prof. B. T. Blanpied and Prof. C. S. Cook, and was intended for use with Jordan's Vertebrates of the Northern United States as published in 1880.

The List here given has also been prepared by Prof. Worthen who has embodied his own notes made since the previous edition was issued, as well as some additional information furnished by other naturalists, residents now or of late in this vicinity, whose names are given in connection with the items reported by them. To Prof. Worthen and to these gentlemen cordial thanks are rendered.

The classification adopted is that of the Fifth and Revised Edition of Jordan's Vertebrates of 1888, involving very many changes in both names and general arrangement. The above book must therefore be consulted for full descriptions.

The accompanying map, contributed by the students, indicates clearly the region represented by the Flora and Fauna.

Additions and corrections are solicited, and will always be welcome.

Hanover, N. H., Jan. 23, 1891.

H. G. J.
MAP OF THE REGION WITHIN THIRTY MILES OF HANOVER, N. H.
CATALOGUE OF PLANTS.

SERIES 1.

PHÆNOGAMOUS OR FLOWERING PLANTS.

CLASS I. DICOTYLEDONOUS OR EXOGENOUS PLANTS.

SUBCLASS I. ANGIOSPERMÆ.

DIVISION I. POLYPETALOUS EXOGENS.

ORDER I. RANUNCULACEÆ. Crowfoot Family.

Clematis, L. Virgin's Bower.
C. Virginiana, L. River-banks, etc.; common.

A. cylindrica, Gray. Pomfret, Windsor, and Norwich, Vt.; not abundant.
A. Virginiana, L. Woods and roadsides; common.
A. nemorosa, L. Margin of woods; common.

Hepatica, Dill. Liver-leaf. Liverwort.
H. acutiloba, DC. Woods. The more abundant species.

Anemonella, Spach. Rue-Anemone.
A. thalictroides, Spach. (Thalictrum anemonoides, Michx.) Claremont, Dr. N. Barrows; rare.

Thalictrum, Tourn. Meadow-Rue.
T. dioicum, L. (Early-Rue.) Rocky woods; common.
R. aquatilis, L., var. trichophyllus, Gray. (White Water-Crowfoot.) Slow streams. Dr. Barrows; rare.
R. multifidus, Pursh. (Yellow Water-Crowfoot.) Hanover, N. H.; Norwich, Vt.; rare.
R. abortivus, L. (Small-flowered Crowfoot.) Common.
R. recurvatus, Poir. (Hooked Crowfoot.) Common.
R. fascicularis, Muhl (Early C.) North Charlestown, Dr. Graves.
R. Pennsylvanicus, L. (Bristly Crowfoot.) Wet places; common.
R. Bulbosus, L. Hanover, F. P. Comings; Meriden, Dr. Barrows; Norwich, Vt., Dr. Blanchard; Chelsea, Vt., J. M. Comstock.
R. Acris, L. Common Buttercup. This and the above, European weeds.

Caltha, L. Marsh-Marigold. Cowslips.
C. palustris, L. Hanover and Lebanon, N. H.; Norwich, Vt.; etc.; common.

Coptis, Salisb. Gold-thread.
C. trifolia, Salisb. Wet woods; common.

Aquilegia, Tourn. Columbine.
A. Canadensis, L. Rocks; common.

Cimicifuga, L. Bugbane.
C. racemosa, Nutt. (Black Cohosh.) Claremont, Dr. Barrows; very rare.

Actaea, L. Baneberry.
A. spicata, L., var. rubra, Ait. (Red Baneberry.) Rich woods; common.
A. alba, Bigel. (White Baneberry.) A little later in flowering.
Among cultivated plants of this Order are various species of Anemone, Clematis, Aquilegia (Columbine), Delphinium (Larkspur), Aconitum (Monkshood), Paeonia (Paeony), Ranunculus, etc.

Menispermum, L. Moonseed.
M. Canadense, L. Claremont, both sides Conn. river. Dr. Barrows.

Berberis, L. Barberry.
B. vulgaris, L. More commonly cultivated than wild; from Europe.

Caulophyllum, Michx. Blue Cohosh.
C. thalictroides, Michx. Rich woods; common.
CATALOGUE OF PLANTS.

Podophyllum, L. Mandrake.
   P. peltatum, L. Hanover, N. H.; Norwich, Vt., E. A. Mack; doubtless introduced.

Order 4. NYMPHÆACEÆ. Water-Lily Family.

Brasenia, Schreber. Water-shield.
   B. peltata, Pursh. In ponds.

Nymphaea, Tourn. White Water-Lily.
   N. odorata, Ait. In ponds; common.

Nuphar, Smith. Yellow Pond-Lily.
   N. advena, Ait. (Cow Lily.) Everywhere common.
      var. minus, Morong. (N. rubrodiscum, Morong.) Squam Lake, Jesup. A hybrid, probably, between N. advena and the next species; intermediate in size, with stigmas crenately toothed and bright red or crimson.
   N. Kalmianum, Ait. (N. luteum, var. pumilum. Man., 5th ed.) Hanover, N. H.; Dr. Barrovs; Sherburne, Vt., W. W. Eggleston.

Order 5. SARRACENIACEÆ. Pitcher-Plant Family.

Order 6. PAPAVERACEÆ. Poppy Family.

   S. Canadensis, L. Borders of rich woods; common.

Chelidonium, L. Celandine.
   C. majus, L. Near dwellings and fences; from Europe.

Order 7. FUMARIACEÆ. Fumitory Family.

Dicentra, Borkh. Dicentra.
   D. Cucullaria, DC. (Dutchman's Breeches.) Rich woods; common.
   D. Canadensis, DC. (Squirrel-Corn.) Rich woods; not rare.
      [D. eximia, DC., from Va. is frequent in old gardens.]

Corydalis, Vent.
   C. glauca, Pursh. (Pale Corydalis.) Rocky places and clearings.
   C. aurea, Willd. (Golden Corydalis.) Norwich, Vt., near the Passumpsic.
      R. R. Jesup.

Fumaria, Tourn. Fumitory.
   F. officinalis, L. A weed in gardens; European.
Order S. **CRUCIFERÆ. Mustard Family.**

**Dentaria,** Tourn. Pepper-root.
- D. diphylla, L. Rich woods; common.
- D. laciniata, Muhl. Plainfield, *Dr. Barrows*; rare.
- D. maxima, Nutt. With the first, but less common.

**Cardamine,** Tourn. Bitter Cress.
- C. hirsuta, L. Wet ground. A slender variety is found in dry places.

**Arabis,** L. Rock-Cress.
- A. hirsuta, Scop. Rocky places; not rare.
- A. perfoliata, Lam. (Tower Mustard.) Hartford, Vt., *Flint*; Norwich, Vt., *Jesup*; Hanover, Lyme, etc.; not common.

**Camelina,** Crantz. False Flax.

**Nasturtium.** R. Br. Water-Cress.
- N. sylvestre, R. Br. (Yellow Cress.) A weed in river meadows. Norwich, Vt.; etc.; from Europe.
- N. palustre, DC. Marsh Cress. Wet places; common.
- N. armoracia, Fries. (Horseradish.) Rarely seen in fruit; European.

- B. vulgaris, R. Br. Low grounds; common.

**Hesperis,** Tourn. Common Rocket.
- H. matronalis, L. Roadsides, etc.; a garden escape.

**Erysimum,** Tourn. Treacle Mustard.
- E. cheiranthoides, L. Hanover; a weed in gardens.

**Sisymbrium,** Tourn. Hedge Mustard.

**Brassica,** Tourn. Cabbage, Mustard, etc.
- B. campestris, L. (Kale.) Common in grain fields; a troublesome weed.
- B. alba, Gray. (White Mustard.) Rare.
- B. nigra, Koch. (Black Mustard.) Common near dwellings; all from Europe.

**Capsella,** Medic. Shepherd's Purse.
- C. BURSA-PASTORIS, Moench. A weed in gardens; from Europe.

**Thlaspi,** Tourn. Pennycress.
CATALOGUE OF PLANTS.

Lepidium, Tourn. Peppergrass.
L. Virginicum, L. Roadsides; common.
L. campestre, Br. Hanover, C. H. Dana; not common; European.
L. ruderalae, L. Hanover, etc.; along with L. Virginicum; from Europe.

Raphanus, Tourn. Wild Radish.
R. raphanistrum, L. (Jointed Charlock.) Hanover; not rare in grain fields; European.

[Cultivated plants:—Various kinds of Brassica (Cabbage and Turnip), Raphanus sativum (Garden Radish), Lepidium sativum (Garden Peppergrass), Matthiola (Stock), Iberis (Candytuft), Alyssum maritimum (Sweet Alyssum), etc.]

Helianthemum, Tourn. Rock-Rose.

Lechea, Kalm. Pinweed.
L. major, Michx. Dry and sterile fields; common.
L. minor, L. With the above and quite variable, including perhaps more than one species.

Viola, Tourn. Violet.
V. palmata, L. (V. cucullata, var. palmata. Gray.)—(Palmately-leaved Violet.) On drier ground than the variety, and less common.
var. cucullata, Gray. (V. cucullata, Ait.)—(Common Blue Violet.) Very common everywhere.
V. sagittata, Ait. Hanover, etc. Roadsides and upland pastures; not abundant.
V. Selkirkii, Pursh. (Selkirk Violet.) Shady hillsides; not very common.
V. blandu, Willd. (Sweet White Violet.) Moist places; common, and very variable.
var. palustriformis, Gray. "The larger form; in shady, mossy ground."
var. renifolia, Gray. (Kidney-leaved Violet.) Named from specimens collected in 1870 by F. A. Sherman; common in rich, rocky woods.
V. primulæfolia, L. (Primrose-leaved Violet.) With the next. New London, W. F. Carter; not common.
V. rotundifolia, Michx. (Round-leaved Violet.) Moist woods. The earliest species; common.
V. pubescens, Ait. (Downy Yellow Violet.) Woods; common and variable.
V. Canadensis, L. (Canada Violet.) Rich woods; common.
V. rostrata, Pursh. (Long-spurred Violet.) With the above.
V. canina, L. var. Muhlenbergii, Gray. (Dog Violet.) Everywhere common and rather variable.
V. Tricolor, L. (Pansy.) Spontaneous in gardens along with V. Odorata, the English Sweet Violet.

**Order ii. Caryophyllaceae. Pink Family.**

**Dianthus**, L. Pink.
D. Armeria, L. (Deptford Pink.) Randolph, Vt., *Bates.*
D. Deltoides, L. (Maiden Pink.) Near Sharon, Vt.; well established on the roadside, *Jesup.*

S. officinalis, L. Roadsides; commonly double; European.

**Silene**, L. Catchfly.
S. Cucubalus, Wibel. (S. inflata, Smith)—(Bladder Campion.) Meriden and Hanover, N. H.; Chelsea, Vt.; etc. Roadsides; European.
S. antirrhina, L. (Sleepy Catchfly.) Waste places.
S. Noctiflora, L. Frequent; introduced with grass seed.
[S. Armeria, L. (Sweet-William Catchfly.) Spontaneous in gardens.]

**Lychnis**, Tourn. Lychnis.
L. Githago, Lam. (Corn-cockle.) Hanover, in cultivated fields; from Europe.

**Arenaria**, L. Sandwort.
A. Serpyllifolia, L. Windsor, Vt., *Leland.* Waste places; European.
A. Groenlandica, Spreng. (Mountain Sandwort.) Moosilauke Mt., *W. H. Flint; Kearsarge Mt., Dr. Barrows.*
A. lateriflora, L. Lebanon, at Olcott Falls; infrequent.

**Stellaria**, L. Chickweed.
S. Media, Smith. (Common Chickweed.) From Europe.
S. longifolia, Muhl. (Long-leaved Stitchwort.) Grassy places.
S. longipes, Goldie. Claremont, *Dr. Barrows; rare.*
S. borealis, Bigel. Wet, shady places; not rare.
S. uliginosa, Murr. (Swamp Chickweed.) Rochester, Vt., *Eggleston.*

**Cerastium**, L. Chickweed.
C. arvense, L. Rocky pastures north of Windsor, Vt., *Flint; Hanover, N. H., G. M. Moore; scarce.*

**Sagina**, L. Pearlwort.
S. procumbens, L. Moist places.

B. rubra, Dumort. (Spergularia rubra. Presl.) Dry, sandy soil; Canaan and Claremont, N. H., *Dr. Barrows; Royalton, Vt., H. Q. Ward; Plymouth and New London, N. H., Sargent.*
Spergula, L. Spurrey.
S. arvensis, L. (Corn-Spurrey.) Hanover, Meriden, etc.; in cultivated grounds; European.

Order 12. **PORTULACACEÆ.** Purslane Family.

**Portulaca,** Tourn. Purslane.
P. oleracea, L. A common weed in gardens; European.

**Claytonia,** Gronov. Spring-Beauty.
C. Caroliniana, Michx. Common in open woods.

Order 13. **HYPERICACEÆ.** St. John’s-wort Family.

**Hypericum,** Tourn. St. John’s-wort.
H. ellipticum, Hook. Wet places.
H. perforatum, L. (Common St. John’s-wort.) Fields; European.
H. maculatum, Walt. (H. corymbosum, Muhl.) Damp places; common.
H. mutilum, L. Damp places.
H. Canadense, L. Very common in sandy soil.
var. majus, Gray. Not uncommon.
H. nudicaule, Walt. (H. Sarothra, Michx.)—(Orange Grass.) Sandy fields; common.

**Elodes,** Adans. Marsh St. John’s-wort.
E. campanulata, Pursh. (E. Virginica, Nutt.) Swamps.

Order 14. **MALVACEÆ.** Mallow Family.

**Malva,** L. Mallows.
M. rotundifolia, L. (Common Mallow.) Near dwellings.
M. crispa, L. (Curled Mallow.) Occasionally seen on the roadsides.
M. moschata, L. (Musk Mallow.) Roadsides and fields.
M. sylvestris, L. (High Mallow.) Old gardens; all European.

**Abutilon,** Tourn. Indian Mallow.
A. Avicennæ, Gærtn. (Velvet-Leaf.) Roadsides and waste heaps; from India.

**Hibiscus,** L. Rose-Mallow.
[H. Trionum, L. (Flower-of-an-hour.) State Farm, Hanover; occasionally seen; European.]

Order 15. **TILIACEÆ.** Linden Family.

T. Americana, L. Woods; common.
[T. Europæa, L. (European Linden.) Planted by the roadsides and in private grounds. This tree (the Lin) gave the family name to Linnaeus.]
Order 16. **LINACEAE. Flax Family.**

**Linum**, Tourn. Flax.
L. Virginianum, L. (Wild Flax.) Dry woods.

Order 17. **GERANIACEAE. Geranium Family.**

G. maculatum, L. (Cranesbill Geranium.) Hanover, N. H.; Norwich, Vt.; etc. Open fields.
G. Robertianum, L. (Herb Robert.) Common on moist rocks.
G. Carolinianum, L. Not uncommon; in waste places.

**Erodium**, L'Her. Storksbill.
E. cicutarium, L'Her. Ludlow, Vt., Miss Pollard. Rarely met with; European.

I. pallida, Nutt. Windsor and Hartland, Vt., etc., Leland. Less common than the next.
I. fulva, Nutt. Common in wet places.

**Oxalis**, L. Wood-Sorrel.
O. Acetosella, L. (True Wood-Sorrel.) Common.
O. violacea, L. (Violet Wood-Sorrel.) Cavendish, Vt., Dr. Graves. Very unusual so far north, and probably rare.
O. corniculata, L. var. stricta, Sav. (O. stricta, L.)—(Yellow Wood-Sorrel.) A common weed and very variable.

Order 18. **RUTACEAE. Rue Family.**

**Xanthoxylum**, L. Prickly Ash.
X. Americanum, Mill. Claremont, N. H., Dr. Barrows; Norwich and Hartford, Vt., etc.

[**Ptelea trifoliata**, L. (Hop-tree.) From the West, is often planted.]

Order 19. **ILICINEAE. Holly Family.**

(Formerly aquifoliace.e.)

**Ilex**, L. Holly.
I. verticillata, Gray. (Black Alder.) Common in low grounds.

**Nemopanthes**, Raf. (Mountain Holly.)
N. fascicularis, Raf. (N. Canadensis, DC.) Common in wet cold woods.

Order 20. **CELASTRACEAE. Staff-tree Family.**

**Celastrus**, L. Staff-tree.
C. scandens, L. (Climbing Bitter-sweet.) Along streams.

[**Euonymus atropurpureus**, Jacq. ( Burning Bush.) From the West; common in cultivation.]
Order 21. **RHAMNACEÆ.** Buckthorn Family.

**Rhamnus,** Tourn. Buckthorn.
R. cathartica, L. Used for hedges; sometimes running wild; European.

**Ceanothus,** L. New Jersey Tea.
C. Americanus, L. Dry woodlands. Lebanon near Conn. river, etc.

Order 22. **VITACEÆ.** Vine Family.

**Vitis,** Tourn. Grape.
V. Labrusca, L. (Fox grape.) Often near old homesteads, sometimes cultivated; doubtful if native in this region.
V. æstivalis, Michx. (Summer grape.) Possibly native.
V. cordifolia, Michx. As the species is now understood, it may be that plants referred to this species should be included in the next.
V. riparia, Michx. (Frost grape.) Common. This is V. cordifolia, var. riparia, of Gray’s Man. (1870). Dr. Engelmann writes (1876):—“I doubt if V. cordifolia grows at all in New England.” See his synopsis of the Genus in Am. Nat., Vol. VI, p. 539. See, also, Gray’s Manual (1890).

**Ampelopsis,** Michx. Woodbine. Virginian Creeper.
A. quinquefolia, Michx. Common on river-banks, etc.

Order 23. **SAPINDACEÆ.** Soapberry Family.

**Æsculus,** L. Horse-chestnut. Buckeye.
[Æ. Hippocastanum, L. (Horse-chestnut.) Common in cultivation everywhere. Native of Europe.]
[Æ. Glabra, Willd. (Petid or Ohio Buckeye.) Not native in New England, but not rare in cultivation along with Æ. Pavia.]

**Acer,** Tourn. Maple.
A. Pennsylvanicum, L. (Striped Dogwood. Moose-Wood.) Woods; common.
A. spicatum, Lam. (Mountain Maple.) Common with the above.
var. nigrum, Torr. & Gray. (Black Sugar Maple.) Probably not uncommon. Recognized by Michaux as a distinct species, and common outside New England. He noticed it “at Windsor, Vt., but of inferior size.” (Michaux’s N. A. Sylva, Vol. I, p. 163.) It is seldom distinguished from the ordinary Sugar Maple.
A. dasycarpum, Ehrh. (White or Silver Maple.) On river-banks.
A. rubrum, L. (Red or Swamp Maple.) Very common.
[A. Platanoides (Norway Maple), with fruit having long divergent wings, and A. Pseudo-Platanus with long racemes of pubescent fruit, are often planted.]

**Negundo,** Moench. Ash-leaved Maple. Box-Elder.
N aceroides, Moench. Not native in New England, but often planted and sometimes spontaneous, as on the White River at Sharon, Vt., Dr. Baxter.
Staphylea, L. Bladder-Nut.

Order 24. ANACARDIACEÆ. Cashew Family.

Rhus, L. Sumach.
R. typhina, L. (Staghorn Sumach.) Fields; very common. This species and the next two are not poisonous.
R. glabra, L. (Smooth Sumach.) Fields; common.
R. venenata, DC. (Poison Sumach. Poison Dogwood.) Claremont, N. H., Dr. Barrows; Mud Pond, Canaan, N. H., Jesup; Windsor, Vt., Leland. Not uncommon in swamps throughout the district.
R. Toxicodendron, L. (Poison Ivy.) Very common, and, like the preceding, very poisonous to the touch.

Order 25. POLYGALACEÆ. Milkwort Family.

Polygala, Tourn. Milkwort.
P. paucifolia, Willd. (Fringed Polygala.) Borders of woods; common.
P. polygama, Walt. Claremont, Dr. Barrows; New London, Miss Messer.
P. verticillata, L. Claremont, Dr. Barrows.
var. ambigua (P. ambigu, Nutt.) Lebanon, Sargent.

Order 26. LEGUMINOSÆ. Pulse Family.

Lupinus, Tourn. Lupine.
L. perennis, L. Claremont, etc., Dr. Barrows; Plymouth, Miss Langdon; rare; abundant farther south.

T. arvense, L. (Stone Clover.) Old fields and roadsides.
T. pratense, L. (Red Clover.) Meadows.
T. repens, L. (White Clover.) Everywhere common.
T. agrarium, L. (Yellow or Hop-Clover.) Meadows and roadsides.
T. procumbens, L. Claremont, Dr. Barrows; Royalton, Vt., H. Q. Ward.
Uncommon; has pinnately trifoliate leaves and very small heads. This and all the preceding species are European, except T. repens.
T. hybridum, L. (Alsike or Dutch Clover.) From Holland. Meadows.

Melilotus, Tourn. Melilot.
M. officinalis, Wild. (Yellow Melilot.) Waste or cultivated grounds; both species from Europe.
M. alba, Lam. (White Melilot or Sweet Clover.) Near dwellings and sometimes in gardens.
Medicago, Tourn. Medick.
M. SATIVA, L. (Lucerne, Alfalfa.) Claremont, N. H., Dr. Barrows; Pomfret, Vt., A. P. Morgan. Cultivated sometimes for green fodder.
M. LUPULINA, L. (Black Medick.) Claremont, Dr. Barrows. In grass ground, Hanover, etc., and often mistaken for a Trifolium.
M. MACULATA. Willd. (Spotted Medick.) Claremont, Dr. Barrows. This and the next species introduced in foreign wool, and probably transient visitors. The entire genus is European.
M. DENTICULATA, Willd. Claremont, Dr. Barrows.

Robinia, L. Locust-tree.
R. Pseudacacia, L. (Common Locust.) Naturalized from Penn. and the Southwest.
R. viscosa, Vent. (Clammy Locust.) Native of Virginia, and spreading freely.

Astragalus, Tourn. Milk-Vetch.
A. alpinus, L. On rocks at Sumner's Falls, Plainfield, N. H., Flint; very rare.

Desmodium, Desv. Tick-Trefoil.
D. nudiflorum, DC. Dry woods; common.
D. acuminatum, DC. Woods; common.
D. rotundifolium, DC. Dry rocky woods.
D. Dillenii, Darl. Open woodlands.
D. paniculatum, DC. Woods.
D. Canadense, DC. Dry woods; common.
D. rigidum, DC. Dry hillsides.
D. Marilandicum, Boott. Copses; not very common.

L. polystachya, Michx. (L. hirta, Ell.) Dry hillsides; common.
L. capitata, Michx. Dry hillsides; frequent.

Vicia, Tourn. Vetch or Tare.
V. SATIVA, L. (Common Vetch.) Cultivated fields; not uncommon; from Europe.
VAR. ANGUSTIFOLIA, Seringe. Hanover.
V. Cracca, L. Infrequent; usually in grass land.

Apios, Boerhaave. Ground-nut.
A. tuberosa, Moench. Windsor, Vt., Flint; Royalton, Vt., L. Wild; Plymouth, N. H., Sargent.

A. monoica, Nutt. Borders of woods; very common.

Cassia, Tourn. Wild Senna.
C. Marilandica, L. Hartford, Vt. Alluvial soil; rare.
Gleditschia, L. Honey-Locust.
G. triacanthos, L. Never truly wild in New England; common in cultivation; from the Western States, and sometimes thornless.

[Additional plants of this order:—Coronilla varia (Purple Coronilla), Arachis hypogaea (Peanut), Caragana arborescens (Pean-tree), Wisteria sinensis (Chinese Wisteria), Phaseolus (Garden Bean), Pisum sativum (Garden Pea), besides others from the Western States and from Europe.]

Order 27. ROSACEÆ. Rose Family.

Prunus, Tourn. Plum. Cherry.
P. Americana, Marshall. (Wild Yellow or Red Plum.) Not common.
P. pumila, L. (Dwarf Cherry.) Islands in the Conn. river near Hanover, etc. Jesup.
P. Pennsylvanica, L. (Red Cherry.) Very common everywhere.
P. Virginiana, L. (Choke-Cherry.) Very common.
P. serotina, Ehrh. (Black Cherry.) Common.

Spiraea, L. Meadow-Sweet.
S. salicifolia, L. (Common Meadow-Sweet.) Roadsides and pastures.
S. tomentosa, L. (Hardhack. Steeple-Bush.) Roadsides; common.
S. sorbifolia, from Siberia, with leaves like the Mountain Ash, is well established in many places.

R. odoratus, L. (Purple Flowering Raspberry.) Often wrongly called Mulberry.
R. triflorus, Richardson. (Dwarf Raspberry.) Much like a Blackberry.
R. strigosus, Michx. (Wild Red Raspberry.)
R. occidentalis, L. (Black Raspberry. Thimbleberry.) Both this and all the preceding species common.
R. villosus, Ait. (High Blackberry.) Very variable in size and shape of fruit. Very common.
R. Canadensis, L. (Low Blackberry.) Dry fields. The smaller and trailing forms of the last connect with this species.
R. hispidus, L. (Running Swamp-Blackberry.) Not very common.

Dalibarda, L.
D. repens, L. Low woods; common.

Geum, L. Avens.
G. album, Gmelin. Borders of woods; common.
G. Virginianum, L. Borders of woods; common.
G. strictum, Ait. Moist meadows; frequent.
G. rivale, L. (Water Avens.) Wet meadows.

Waldsteinia, Willd.
W. fragarioides, Tratt. (Barren Strawberry.) Wooded hillsides; common.

Fragaria, Tourn. Strawberry.
F. Virginiana, Mill. (Field Strawberry.) Everywhere common.
F. vesca, L. (Wood Strawberry.) Less common than the preceding.
Potentilla, L. Cinque-foil. Five-Finger.

P. arguta, Pursh. Roadsides. Hanover; Lebanon; not rare.
P. Norvegica, L. Dry fields; common.
P. argentea, L. (Silvery Cinque-foil.) Dry, barren fields; common.
P. palustris, Scop. (Marsh Five-Finger.) Cold bogs; George Pond, Enfield, etc.
P. fruticosa, L. (Shrubby Cinque-foil.) Claremont, N. H., Dr. Barrows; Chittenden, Vt., Flint; a shrub.
P. tridentata, Ait. (Three-toothed Cinque-foil.) Kearsarge Mt., Dr. Barrows; Moosilauke Mt., Flint.
P. Canadensis, L. (Common Five-Finger.) Dry soil; very common; stem commonly prostrate; sometimes erect.

Agrimonia, Tourn. Agrimony.

A. Eupatoria, L. (Common Agrimony.) Roadsides.

Poterium, L. Burnet.

P. Canadense, Bentham & Hook. (Canadian Burnet.) Bristol, N. H., etc., F. L. Pattee. Not common.

Rosa, Tourn. Rose.

R. blanda, Ait. (Early Rose.) Banks of Conn. river, Hanover, N. H.; Fairlee, Vt., Sargent. Not very common.
R. Carolina, L. (Swamp Rose.) Swamps and river-banks throughout.
R. humilis, Marsh. (R. lucida of most authors)—(Dwarf Rose.) With the same range as R. blanda, but more common. The true lucida is found on the New Hampshire seacoast.
R. rubiginosa, L. (Sweet-brier.) Roadsides and pastures; not abundant, but widely distributed; European.
R. cinnamomea, L. (Cinnamon Rose.) Native of Europe, very common about old dwellings, always double.

Pyrus, L. Pear. Apple.

P. arbutifolia, L. (Choke-berry.) Swamps; common, with red fruit.
var. melanocarpa, Hook. With black fruit.
P. Americana, DC. (Mountain Ash.) Common.

[C. oxyacantha, L. (English Hawthorn.) Cultivated for ornamental purposes, and sometimes spontaneous.]
C. coccinea, L. (Scarlet-fruited Thorn.) Common in hillside pastures, etc.
var. macracantha, Dudley. Frequent and quite distinct from the type. Perhaps a distinct species. Hanover, Lyme, Lebanon, and Enfield, N. H.; Norwich, Hartford, etc., Vt.
C. punctata, Jacq. Widely distributed on both sides of the Conn. river.
C. Crus-galli, L. Claremont, Dr. Barrows; College Park, Hanover. Not common, and possibly not indigenous.
Amelanchier, Medic. June-berry.
The more common form.
var. oblongifolia, Gray. Not rare; two weeks later. A smaller tree or shrub.

[This Order also includes numerous species of the Genus PRUNUS (Plum, Cherry, Peach, Nectarine, and Apricot); Spiraea (many species); Pyrus communis (Pear); Pyrus malus (Apple); Pyrus prunifolia (Siberian Crab-apple); and Cydonia vulgaris (Common Quince).]

Order 28. SAXIFRAGACEAE. Saxifrage Family.

Saxifraga, L. Saxifrage.
S. Virginiana, Michx. (Rock Saxifrage.) Common on rocks.
S. Pennsylvanica, L. (Swamp Saxifrage.) Common in swamps.

Tiarella, L. False Mitre-wort.
T. cordifolia, L. Common in moist ground.

M. diphylia, L. Hillsides in rich woods; very common.
M. nuda, L. Wet woods in moss. Hanover, N. H.; Norwich, Vt.; etc.

Not rare.

Chrysosplenium, Tourn. Golden Saxifrage.
C. Americanum, Schwein. Common in wet places.

Parnassia, Tourn. Grass of Parnassus.

Philadelphus, L. Mock Orange. Syringa.
[P. Grandiflorus, Willd. Cultivated from Virginia.]
[P. Coronarius, L. In cultivation from Europe.]

R. Cynosbati, L. (Prickly Gooseberry.) Common.
R. prostratum, L’Her. (Fetid Currant.) Common in damp, rocky woods.
R. floridum, L’Her. (Wild Black Currant.) Woods, and frequent in old gardens.
R. rubrum, L. var. subglandulosum, Maxim. This is the native Red Currant of the White Mts. and Northern New England. The Red Currant of the garden is the European form (R. rubrum) introduced by the early settlers. The two forms however cannot readily be distinguished.
R. aureum, Pursh. (Missouri Currant.) Common in cultivation, and persisting for years about old homesteads. Native of Missouri and the West.
Order 29. CRASSULACEAE. Orpine Family.

P. sedoides, L. Open wet places.

S. acre, L. (Mossy Stone-crop.) Norwich, Chelsea, and Royalton, Vt.; on rocks, etc. Frequent in gardens throughout the district.
S. telephium, L. (Live-for-ever.) Very widely distributed and thoroughly naturalized; both species European.

Order 30. DROSERACEAE. Sundew Family.

*Drosera*, L. Sundew.
D. rotundifolia, L. Peat bogs and banks of brooks; common.
D. intermedia, Hayne. var. Americana, DC. (D. longifolia. Man., 5th ed.) Hanover, Canaan, Enfield, Plainfield, etc. Sandy shores of ponds and on decaying logs.

Order 31. HAMAMELIDAE. Witch-Hazel Family.

*Hamamelis*, L. Witch-Hazel.
H. Virginiana, L. Peculiar for blooming in October and not perfecting its fruit until the next autumn; common in woods.

Order 32. HALORAGACEAE. Water-Milfoil Family.

M. spicatum, L. Enfield Pond, *Jesup*; not rare.
M. verticillatum, L. Mascoma Creek, West Lebanon, etc., *Jesup*.

*Proserpinaca*, L. Mermaid-weed.
P. palustris, L. Swamps and ditches; common.

*Hippuris*, L. Mare’s Tail.

*Callitriche*, L. Water-Starwort.
C. verna, L. Ponds; common.

Order 33. LYTHRACEAE. Loosestrife Family.

*Lythrum*, L. Loosestrife.
L. salicaria, L. (Spiked Loosestrife.) Claremont, N. H., *Dr. Graves*; Sharon, Vt., etc.; often cultivated, and commonly trimorphous.

Order 34. ONAGRACEAE. Evening-Primrose Family.

*Ludwigia*, Ell. False Loosestrife.
L. palustris, L. (Water Purslane.) Ditches; common.

*Epilobium*, L. Willow-herb.
E. angustifolium, L. (Often like Erechites, called “Fire-weed.”) Common in moist and newly cleared lands.
CATALOGUE OF PLANTS.

E. lineare, Muhl. (E. palustre, var. lineare, Man., 5th ed.) Bogs; common.
E. strictum, Muhl. (E. molle, Torr.) Claremont, Dr. Barrows; not common.
E. coloratum, Muhl. Wet places; very common.
   [A number of new species of this genus have recently (Man., 6th ed.) been assigned to this region, some of which doubtless are collected as forms of the above and remain to be distinguished from them.]

E. biennis, L. Fields and roadsides everywhere; many vars.; one with large flowers is found in gardens (var. grandiflora).
E. pumila, L. Dry fields; common.

C. Lutetiana, L. Damp shades; common.
C. alpina, L. Rocky, wet woodlands; much like a small form of the former.

Order 35. CUCURBITACEÆ. Cucumber Family.

Sicyos, L. Bur-Cucumber.
S. angulatus, L. Wet, shady places and waste heaps; a not uncommon weed in Hanover, etc.

E. lobata, Torr. & Gray. Banks of streams, Hanover, N. H.; Sharon, Vt.; etc.
   [Cultivated species of this Order belong to the Genera:—LAGENARIA (Bottle Gourd), CUCURBITA (Pumpkin, Squash, and Egg Gourd), CITRULUS (Watermelon), CUCUMIS (Melon and Cucumber).]

Order 36. FICOIDEÆ.

Mollugo, L. Carpet-weed.
M. verticillata, L. A common weed in cultivated ground. Formerly included in the Pink Family (CARYOPHYLLACEÆ).

Order 37. UMBELLIFERÆ. Parsley Family.

Daucus, Tourn. Wild Carrot.
D. Carota, L. A noxious weed of the old world; the cultivated carrot run wild.

Angelica, L.

Conioselinum, Fisch. Hemlock-Parsley.

Heracleum, L. Cow-Parsnip.
H. lanatum, Michx. Moist, rich ground; common.

Pastinaca, L. Wild Parsnip.
P. sativa, L. Fields; common; from Europe.
CATALOGUE OF PLANTS.

Ligusticum, L. Lovage.  
L. Scoticum, L. Near dwellings; Hanover, etc.; perhaps a garden escape.

Cryptotænia, DC. Honewort.  
C. Canadensis, DC. Thickets; not rare.

Sium, Tourn. Water-Parsnip.  
S. ciutaæfolium, Gmelin. (S. lineare, Michx.) Wet places; common.

Zizia, Koch. Meadow-Parsnip.  
Z. aurea, Koch. (Thaspium aureum, var.apterum, Gray’s Man., 5th. ed.) In moist meadows; common.

Carum, L. Caraway.  
C. Carui, L. Everywhere near dwellings; European.

Cicuta, L. Water-Hemlock.  
C. maculata, L. (Spotted Cowbane.) Root very poisonous; common.  
C. bulbifera, L. Swamps; seldom fruiting, the flowers replaced by bulblets.

Conium, L. Poison Hemlock.  
C. Maculatum, L. On waste heaps; a virulent poison. Hanover, etc. From Europe.

Osmorrhiza, Raf. Sweet Cicely.  
O. longistyris, DC. With, but less common than, the preceding.

Hydrocotyle, Tourn. Water Pennywort.  
H. Americana, L. Wet places; common.

S. Marilandica, L. With the variety but more common. Borders of woods.  
var. Canadensis, Torr. (S. Canadensis, L.)

[This large Order also includes,—Apium graveolens (Celery), Carum Petroselinum (Parsley), Fëniculum vulgare (Fennel), etc.]

Order 38. ARALIACEÆ. Ginseng Family.

Aralia, Tourn.  
A. racemosa, L. (Spikenard.) Rich woodlands; often cultivated.  
A. hispida, Vent. (Bristly Sarsaparilla.) Rocky places; frequent.  
A. nudicaulis, L. (Wild Sarsaparilla.) Borders of woods; common.  
A. quinquefolia, Dec. & Pla. (Ginseng.) Rich woods; not infrequent.  

Order 39. CORNACEÆ. Dogwood Family.

C. Canadensis, L. (Bunch-berry.) Common.  
C. florida, L. (Flowering Dogwood.) Plainfield, N. H., Miss Stevens; Springfield, Vt., Rev. S. Hayward; Charlestown and New London, N. H.; Pomfret, Vt., etc.; rare so far northward.
C. circinata, L'Her. (Round-leaved Cornel.) Hanover, N. H.; West Hartford, Vt., Flint; and Killington Mt., Vt., Rev. H. M. Denslow.

C. sericea, L. (Silky Cornel.) Borders of ponds; frequent.

C. stolonifera, Michx. (Red-osier Dogwood.) Wet places; common.

C. paniculata, L'Her. (Panicled Cornel.) Charlestown, Dr. Graves; Plymouth, Miss Langdon; rare.

C. alternifolia, L. (Alternate-leaved Cornel.) Common by the roadside everywhere.

**Nyssa, L.** Tupelo. Pepperidge. Sour-Gum Tree.

CATALOGUE OF PLANTS.

DIVISION II. GAMOPETALOUS EXOGENS.

Order 40. **CAPRIFOLIAE.** Honeysuckle Family.

*Sambucus,* Tourn. Elder.
S. Canadensis, L. (Black-berried Elder.) Common.
S. racemosa, L. (S. pubens, Michx.)—(Red-berried Elder.) Common.

**Viburnum,** L. Arrow-wood.
V. lantanoides, Michx. (Hobble-bush.) Frequent in woods.
V. Opulus, L. (High Cranberry-bush.) Hanover, Lebanon, and New London, N. H.; Sharon, etc., Vt.; low ground, not rare. The Snow Ball Tree from Europe is a cultivated form of this species.
V. pauciflorum, Pylaie. Claremont, Dr. Barrows; belongs farther northward, and doubtless rare.
V. acerifolium, L. (Maple-leaved Arrow-wood.) Rocky woods; common.
V. dentatum, L. (Arrow-wood.) Wet places.
V. cassinoides, L. (V. nudum. var. cassinoides, Torr. & Gray.)—(Witherbod.) Swamps in Lebanon and Hanover, N. H.; Sharon and Hartford, Vt.; etc.; common.
V. Lentago, L. (Sheep-berry.) Wet river-banks, etc.; not rare.

**Triosteum,** L. Fever-wort. Horse-Gentian.

**Symphoricarpos,** Dill. Snowberry.
[S. racemosus, Michx. Common in cultivation; native of western Vt. S. **VULGARI** and S. **OCCIDENTALIS** from the Western States are sometimes in private grounds.]

*Lonicer,** L. Honeysuckle. Woodbine.
L. ciliata, Muhl. (Fly-Honeysuckle.) Rocky woods; common.
L. caerulea, L. (Mountain Fly-Honeysuckle.) Claremont, Dr. Barrows; Bear Pond, Canaan, E. S. Comings; Enfield Pond, A. C. French.
L. glauca, Hill. (L. parviflora of Man., 5th ed.) (Twining Honeysuckle.) Hanover, N. H.; Norwich, Vt.; etc.; not rare.
[L. **TATARICA,** L. (Tartarian Honeysuckle.) The common Bush Honeysuckle of cultivation; from Europe.]

**Diervilla,** Tourn.
D. trifida, Moench. (Bush Honeysuckle.) Common in fence rows.

Order 41. **RUBIAE.** Madder Family.

*Houstonia,* L.
H. caerulea, L. (Bluets. Innocence.) Pastures; commonly dimorphous.
Cephalanthus, L. Button-bush.
C. occidentalis, L. New Found Lake, Dr. Barrows; Goose Pond, Canaan;
Andover, A. C. French; Plymouth, Sargent; etc.

Mitchella, L. Partridge-berry.
M. repens, L. Dry woods; common under trees and dimorphous.

Galium, L. Bedstraw. Cleavers.
G. MOLLUGO, L. North Pomfret, Vt., Morgan.
G. Aparine, L. (Cleavers. Goose-Grass.) Moist grounds, Norwich, Vt.,
Eggleston; not common.
G. Kamtschaticum, Steller, (G. circæans, var. montanum, Torr. & Gray.)
Killington Peak, Vt., Denslow.
G. circæans, Michx. (Wild Liquorice.) Woods; not rare.
G. lanceolatum, Torr. (Wild Liquorice.) Pomfret, Vt., Morgan; Han-
over, French;—also Weirs, N. H.; infrequent in dry woods.
G. trifidum, L. (Small Bedstraw.) Swamps; very variable; common.
G. asprellum, Michx. (Rough Bedstraw.) Low thickets; abundant.
G. triflorum, Michx. (Sweet-scented Bedstraw.) Rich woodlands; com-

Order 42. COMPOSITÆ. Composite Family.

E. purpureum, L. (Purple Thoroughwort.) Common in swamps.
E. perfoliatum, L. (Medicinal Thoroughwort.) Low grounds; common.

Solidago, L. Golden-rod.
S. squarrosa, Muhl. Claremont, N. H., Graves; Windsor, Flint; Killings-
ton Mt., Eggleston, and Fairlee Pond, Vt., Jesup.
S. caesia, L. Borders of woodlands; common.
S. latifolia, L. Shaded banks; common.
S. bicolor, L. Dry banks. Also var. concolor, Torr. & Gray, yellow rays.
S. macrophylla, Pursh. (S. thyrsoida, E. Meyer.) Claremont, N. H., Dr.
Barrows; Mt. Ascutney, Leland,—and Killington Mt., Vt., Eggleston.
S. Virgaurea, L., var. alpina, Bigel. Moosilauke Mt., Flint; Killington
Peak, Vt., Dr. Robbins.
S. humilis, Pursh. (S. Virgaurea, var. humilis, Gray.) Mountains.
S. puberula, Nutt. Killington, Mt., Vt., Denslow; Rochester, Vt., Eggleston.
S. uliginosa, Nutt. (S. stricta, Ait.) Peat bogs. Canaan and Hanover,
N. H.; Sharon, Dr. Baxter, and Norwich, Vt., Jesup; occasional.
S. rugosa, Mill. (S. altissima, Man., 5th ed.) Fields; common.
S. neglecta, Torr. & Gray. Swamps, and very variable. Some forms as
determined by Dr. Gray are much like "uliginosa" and "arguta."
Perhaps not very rare; Canaan, Jesup.
S. arguta, Ait. (S. Muhlenbergii, Torr. & Gray.) Borders of woods; fre-
cuent.
S. juncea, Ait. (S. arguta, Torr. & Gray.) Borders of woodlands; com-

20 CATALOGUE OF PLANTS.
S. serotina, Ait. (S. gigantea, Man., 5th ed.) Roadsides; common.
  var. gigantea, Gray. (S. serotina, Man., 5th ed.) low ground; common.
S. Canadensis, L. Fields and roadsides; very common and variable.
S. nemoralis, Ait. Dry, sterile fields; very common.
S. lanceolata, L. Roadsides, etc.; very common.

**Sericocarpus,** Nees. White-topped Aster.
S. conyzoides, Nees. Dry grounds.

**Aster,** L. Starwort. Aster.
A. corymbosus, Ait. Woodlands; common.
A. macrophyllus, L. Borders of woods; common.
A. Novæ-Angliæ, L. Royalton, Vt., Ward; more common southward.
A. patens, Ait. Dry ground.
A. undulatus, L. Woodlands; common.
A. cordifolius, L. Woodlands; very common.
[A. Lindleyanus, T. & G. has been found at Lisbon, N. H., by C. E. Faxon, just beyond our limits.]
A. lævis, L. Woodlands.
A. ericoides, L. Dr. Barrows. More common southward.
A. polyphyllus, Willd. "Heads larger and flowering earlier than the preceding."
A. multiflorus, Ait. Claremont, N. H., Dr. Graves; Norwich, Vt., Sargent.
A. dumosus, L. Claremont, Dr. Barrows; scarce.
A. viminalis, Lam. (A. Tradescanti, Man., 5th ed.) Moist banks and variable.
A. diffusus, Ait. (A. miser, Man., 5th ed.) Roadsides and fields; very common and variable.
A. Tradescanti, L. (A. tenuifolius, Man., 5th ed.) With the next, but not readily distinguished from it.
A. paniculatus, Lam. (A. simplex, Man., 5th ed.) Moist banks; very common.
A. salicifolius, Ait. (A. carneus, Man., 5th ed.) What appears to be this species has been found with the preceding.
A. Novi-Belgii, L. (A. longifolius, Man., 5th ed.) Moist ground and very variable.
A. punicus, L. Swamps; very common and variable
A. umbellatus, Mill. (Diplopappus umbellatus, Torr. & Gray.) Moist thickets; common.
A. linariifolius, L. (Diplopappus linariifolius, Hook.) Dry grounds; not very common.
A. acuminatus, Michx. Rich woods; frequent.
A. nemoralis, Ait. George Pond, Enfield. [Todd Pond, Bradford, Barton.]

**Erigeron,** L. Fleabane.
E. Canadensis, L. (Horseweed.)
E. annuus, Pers. (Daisy Fleabane.) Fields and waste places.
E. strigosus, Muhl. (Daisy Fleabane.) A coarser plant than the rest.
  This and both the above common weeds.
E. bellidifolius, Muhl. (Daisy-leaved Fleabane. Robin's Plantain.) Moist meadows and banks; very common.
E. Philadelphicus, L. Moist ground; common.

Antennaria, Gaertn. Plantain-leaved Everlasting.
A. plantaginifolia, Hook. Sterile banks; very common.

Anaphalis, DC. Pearly Everlasting.
A. margaritacea, Benth. & Hook. Dry fields; very common.

Gnaphalium, L. Cudweed.
G. polycephalum, Michx. (Common Everlasting.)
G. decurrens, Ives. (Everlasting.) Old fields.
G. uliginosum, L. (Low Cudweed.) Roadsides. All the species common.

Inula, L. Elecampane.
I. Helenium, L. A coarse plant on roadsides and in pastures. Native of Europe.

Ambrosia, Tourn. Ragweed.
A. trifida, L. (Great Ragweed.) Grantham, Barton.
A. artemisiæfolia, L. (Roman Wormwood.) A common farm weed.

X. spinosum, L. On waste heaps. From Tropical America.
X. strumarium, L. White River Junction, Vt., Flint. Barnyards, etc.; not common. From India.

Heliopsis, Pers. Ox-eye.

Rudbeckia, L. Cone-flower.
R. laciniata, L. Low grounds.
R. hirta, L. Introduced into meadows from the Western States.

Helianthus, L. Sunflower.
H. giganteus, L. Randolph, Vt., Bates; Royalton, Vt., Ward.
H. annuus, L. (Common Sunflower.) Long cultivated and often spontaneous.
H. strumosus, L. Charlestown, Dr. Graves; common farther south.
H. divaricatus, L. Not common.
H. decapetalus, L. Banks of streams, etc.; very common.
H. tuberosus, L. (H. doronicoides, Man., 5th ed.)—(Jerusalem Artichoke.) Often found in old gardens. Dr. Gray has shown that both this species and H. annuus originated in America.

Bidens, L. Bur-Marigold.
B. frondosa, L. (Common Beggar-ticks.) The entire genus is found in swamps and wet places.
B. connata, Muhl. (Swamp Beggar-ticks.) Common in ditches, etc.
B. cernua, L. (Smaller Bur-Marigold.) Not well distinguished from the next; both probably common.
B. chrysanthemoides, Michx. (Larger Bur-Marigold.)
B. Beckii, Torr. (Water Marigold.) Claremont, N. H., Dr. Barrows; Fairlee Pond, Vt., Jesup. Rare.

Galinusoga, Ruiz & Pavon.
G. parviflora, Cav. From South America. On waste heaps; Windsor, Vt., Leland.

Anthemis, L. Chamomile.
A. Cotula, DC. (Maruta Cotula, DC.)—(May-weed.) From Europe; common by roadsides.
A. Arvensis, L. (Corn Chamomile.) From Europe. Occasionally introduced with grass seed.
[A. nobilis, L. (Garden Chamomile.) In old gardens.]

Achillea, L. Yarrow.
A. Millefolium, L. Fields; common.
[A. Ptarmica, L. (Sneezewort.) In old gardens; both single and double.]

Chrysanthemum, Tourn. Ox-eye Daisy.
C. Leucanthemum, L. (Leucanthemum vulgare, Lam.)—(Ox-eye or White Daisy. White-weed.) From Europe. Everywhere in grass ground.
[C. Parthenium, Pers. (Feverfew.) In old gardens.]

Tanacetum, L. Tansy.
T. Vulgare, L. Roadsides everywhere; European weed.

Artemisia, L. Wormwood.
A. Vulgaris, L. (Mugwort.) Near dwellings; from Europe.
A. Absinthium, L. (Wormwood.) Escaped from cultivation; Enfield, etc.; from Europe.

Tussilago, Tourn. Coltsfoot.
T. Farfara, L. Clayey soil, along brooks. Thought to have come from Europe, but now found far from cultivation.

Petasites, Tourn. Sweet Coltsfoot.
[P. palmata, Gray. (Nardosmia palmata, Hook.) A rare plant reported on both our northern and southern borders, and probably within our limits.]

Senecio, Tourn. Groundsel.
S. Vulgaris, L. In cultivated grounds; not common; from Europe.
S. aureus, L. (Golden Ragwort.) Several varieties; in both wet and dry ground.

Erechtites, Raf. Fireweed.
E. Hieracifolia, Raf. Clearings that have been burned over. This and Epilobium augustifolium are the most common Fireweeds.

Arctium, L. Burdock.
A. Lappa, L. (Lappa officinalis, All.) Roadsides; very common and variable; from Europe.
Cnicus, Tourn. Thistle.
C. LANCEOLATUS, Hoffm. (Cirsium, Scop.)—(Common Thistle.) From Europe. In pastures.
C. altissimus, Willd., var. discolor, Gray. (Cirsium discolor, Spreng.) Fields, etc.
C. muticus, Pursh. (Cirsium, Michx.)—(Swamp Thistle.) Common.
C. pumilus, Torr. (Cirsium, Spreng.)—(Pasture Thistle.) Fields; common.
C. ARVENSIS, Hoffm. (Cirsium, Scop.)—(Canada Thistle.) Everywhere. Introduced from Europe, by way of Canada, during the Revolutionary war.

Krigia, Schreber. Dwarf Dandelion.
K. Virginica, Willd. Hanover, N. H.; Olcott, Vt., etc.

Cichorium, Tourn. Chicory or Succory.
C. Intybus, L. Fields and roadides. Hanover, etc. From Europe.

Tragopogon, L. Goat’s-beard.
T. PORRIFOLIUS, L. (Salsify. Oyster-plant.) New London, Sargent; Hanover, etc. A garden escape.

Hieracium, Tourn. Hawkweed.
H. AURANTIACUM, L. From Europe. Found several times by the roadside; Norwich, Vt.; Royalton, Vt., Ward.
H. Canadense, Michx. Dry woods; frequent.
H. paniculatum, L. Open woods; not uncommon.
H. venosum, L. (Rattlesnake-weed.) Woods and plains; common.
H. scabrum, Michx. Dry woods; very common.
H. Gronovii, L. Not common. Dr. Barrows.

Prenanthes, Vaill. Rattlesnake-root.
P. alba, L. (Nabalus, Hook.)—(White Lettuce.) Borders of rich woods.
P. serpentaria, Pursh. (Nabalus Fraseri, DC.)—(Lion’s-foot.) Borders of woods; not rare.

Taraxacum, Haller. Dandelion.
T. OFFICINALE, Weber. (T. Dens-leonis, Desf.) Fields and pastures; introduced from Europe.

Lactuca, Tourn. Wild Lettuce.
L. Canadensis, L. Borders of fields; common.
L. integrifolia, Bigel. (L. Canadensis, var. integrifolia, Torr. & Gray.) With the above.
L. hirsuta, Muhl. (L. Canadensis, var. sanguinea, Torr. & Gray.) Not uncommon.
L. leucophæa, Gray. (Mulgedium, DC.)—(Blue Lettuce.) Low grounds; common.

Sonchus, L. Sow-Thistle.
S. OLERACEUS, L. Waste heaps; common.
Order 43. **LOBELIACEÆ. Lobelia Family.**

**Lobelia, L.**
L. cardinalis, L. (Cardinal-flower.) Borders of streams and ponds in Lebanon, Canaan, New London, Hanover, etc., N. H.; and also in Vermont. Sometimes rose-color or nearly white.
L. spicata, Lam. In gravelly soil.
L. inflata, L. (Indian Tobacco.) Fields; very common.
L. Dortmann, L. (Water Lobelia.) In ponds; New London, *Sargent*; Canaan, Plainfield, etc. Not very rare.

Order 44. **CAMPANULACEÆ. Campanula Family.**

**Specularia,** Heister. Venus's Looking-glass.
S. perfoliata, A. DC. Sterile grounds.

**Campanula,** Tourn. Bellflower.
C. *rapunculoides*, L. Escaped from gardens; a European species.
C. rotundifolia, L. (Harebell.) Rocky or sandy banks; common.
C. aparinoides, Pursh. (Marsh Bellflower.) Wet meadows; in the grass.

Order 45. **ERICACEÆ. Heath Family.**

**Gaylussacia,** HBK.

V. Pennsylvanicum, Lam. (Low Blueberry.) Very common and ripe early.
V. Canadense, Kalm. (Canada Blueberry.) Swamps and low grounds; common.
V. vacillator, Solander. (Half-high Blueberry.) Hanover, N. H.; Hartford and Fairlee, Vt.; N. Pomfret, Vt., *Morgan*. Not common; intermediate in size between the preceding and the next.
V. corymbosum, L. (High or Swamp Blueberry.) Ripens later; abundant and variable.
V. uliginosum, L. (Bog Bilberry.) Moosilauke Mt., *Flint*.
V. *Vitis-Idæa, L*. (Cowberry. Mountain Cranberry.) Moosilauke Mt., *Flint*; Cardigan Mt., *A. Fairbanks*.
V. *Oxyccoccus, L*. (Small Cranberry.) Bogs; frequent.
V. macrocarpon, Ait. (Common Cranberry.) Bogs; common.

**Chiogenes,** Salisb. Creeping Snowberry.

**Arctostaphylos,** Adans. Bearberry.
A. Uva-ursi, Spreng. Fairlee Cliffs, Vt., *F. O. Grover*; and not rare both north and south of our limits.
E. repens, L. Woods and clearings; abundant.

**Gaultheria**, Kalm. Wintergreen or Checkerberry.
G. procumbens, L. Woods; very common.

**Andromeda**, L.
A. polifolia, L. Peat bogs. Lebanon, Meriden, Canaan, etc.

**Cassandra**, Don. Leather-Leaf.
C. calyculata, Don. Swamps; common.

**Kalmia**, L. Laurel.
K. angustifolia, L. (Sheep Laurel.) Common.
K. glauca, Ait. (Pale Laurel.) Cold bogs. Lebanon, Meriden, Hanover, etc

R. maximum, L. (Great Laurel.) This superb plant has been found in North Grantham, *C. H. Hitchcock*, *Dr. Barrows*, *G. C. Barton*.

**Ledum**, L. Labrador Tea.

**Loiseleuria**, Desv. Alpine Azalea.
L. procumbens, Desv. Moosilauke Mt., *A. Fairbanks*.

**Chimaphila**, Pursh. Pipsissewa.
C. umbellata, Nutt. (Prince’s Pine.) Dry woods.
C. maculata, Pursh. With the above.

**Moneses**, Salisb. One-flowered Pyrola.

P. secunda, L. All the species common in rich woods.
P. chlorantha, Swartz. Woods.
P. elliptica, Nutt. (Shin-Leaf.) Woods.
P. rotundifolia, L. Woods; several varieties.

Monotropa, L.  
M. uniflora, L. (Indian Pipe.) Dark woods; common.  
Morgan; Royalton, Vt., Ward.

Order 46. PRIMULACEAE. Primrose Family.

Trientalis, L.  
T. Americana, Pursh. (Star-flower.) Wet woods.

Steironema, Raf.  
S. ciliatum, Raf. (Lysimachia ciliata, L.) Low grounds; common.  
S. lanceolatum, var. hybridum, Gray. (Lysimachia lanceolata, Walt.)  
Banks of Conn. river.

Lysimachia, Tourn. Loosestrife.  
L. quadrifolia, L. (Four-leaved Loosestrife.) Woods; common.  
L. stricta, Ait. (Strict Loosestrife.) Low grounds; common.  
L. thyrsiflora, L. (Tufted Loosestrife.) Mud Pond, Plainfield, N. H.,  
Dr. Barrows; Royalton, Vt., Ward.

L. nummularia, L. (Moneywort.) A troublesome weed in dooryards;  
European.

Anagallis, Tourn. Pimpernel.  
A. ARvensis, L. An occasional weed in gardens; European.

Order 47. OLEACEAE. Olive Family.

Fraxinus, Tourn. Ash.  
F. Americana, L. (White Ash.) Common in rich woods.  
F. pubescens, Lam. (Red Ash.) Squam Lake, N. H.; Randolph, Vt.,  
Bates; occasionally seen.

F. sambucifolia, Lam. (Black or Brown Ash.) Swamps; common.

Ligustrum, Tourn. Privet.  
L. vulgare, L. Naturalized in places. Dr. Barrows. From Europe;  
used for hedges.  
[Chionanthus Virginica (The Fringe-tree of the South), Syringa  
vulgaris (Common Lilac), and S. Persica (Persian Lilac), are in com-  
mon cultivation.]

Order 48. APOCYNACEAE. Dogbane Family.

Apocynum, Tourn.  
A. androsæmifolium, L. (Dogbane.) Borders of thickets; common.  
A. cannabinum, L. (Indian Hemp.) River-banks; frequent.

Order 49. ASCLEPIADACEAE. Milkweed Family.

Asclepias, L. Milkweed. Silkweed.  
A. tuberosa, L. (Butterfly-weed.) Dry fields.  
A. purpurascens, L. (Purple Milkweed.) Charlestown, N. H., Dr. Graves;  
Royalton, Vt., Ward.
CATALOGUE OF PLANTS.

A. incarnata, L. (Swamp Milkweed.) Swamps; common.
   var. pulchra, Pers. With the type.
A. Cornuti, Decaisne. (Common Milkweed.) Everywhere.
A. obtusifolia, Michx. Roadsides; not common.
A. phytolaccoides, Pursh. (Poke Milkweed.) Common.
A. quadrifolia, L. Woods; not rare.

Vincetoxicum, Moench.
V. nigrum, Moench. Windsor, Vt., Leland; rare, introduced from Europe.

Order 50. GENTIANACEAE. Gentian Family.

Gentiana, Tourn. Gentian.
G. crinita, Froel. (Fringed Gentian.) Moist meadows. Hanover Centre, Lyme, etc.; not abundant.
G. quinqueflora, Lam. (Five-flowered Gentian.) Hillside woods and fields. Hanover, Lebanon, etc., Jesup; not very common.
G. Andrewsii, Griseb. (Closed Gentian.) Wet ground; common.

Menyanthes, Tourn. Buckbean.
M. trifoliata, L. In ponds and bogs. Hanover and Meriden, N. H.; Norwich, Vt.; etc.

Limnanthemum, Gmelin. Floating-Heart.
L. lacunosum, Griseb. In ponds; common.

Order 51. POLEMONIACEAE. Polemonium Family.

Phlox, L. Phlox.
[P. paniculata, P. reptans and P. subulata (Moss Pink), perennials; also P. drummondii, an annual;—all from the West and South; have long been cultivated in old gardens.]

Polemonium, Tourn. Greek Valerian.
[P. caeruleum (Jacob's Ladder) of the Middle States, a rare native of New Hampshire, is often cultivated; as also is P. reptans (Greek Valerian) from the same region.]

Order 52. HYDROPHYLLACEAE. Waterleaf Family.

Hydrophyllum, Tourn. Waterleaf.
H. Virginicum, L. (Common Waterleaf.) Damp woods.

Order 53. BORRAGINACEAE. Borage Family.

Cynoglossum, Tourn. Hound's-Tongue.
C. officinale, L. (Common Hound's-Tongue.) Pastures and roadsides; from Europe.
C. Virginicum, L. (Wild Comfrey.) Olcott Falls, etc.

Echinospermum, Lehm. Stickseed.
E. Virginicum, Lehm. (Cynoglossum Morisoni, DC.)—(Beggar's Lice.) Borders of woods.
E. Lappula, Lehm. Waste heaps; European weed.
**Myosotis**, Dill. *Forget-me-not.*
M. laxa, Lehm. (M. palustris, var. laxa, Gray.) Hanover, N. H.; Sharon, VT., Dr. Baxter; Randolph, VT., Rev. J. A. Bates.
M. arvensis, Hoffm. Sharon, VT., Dr. Baxter; Hanover, N. H.; a garden weed.
M. verna, Nutt. Windsor, VT., Leland; not common.

[M. PALUSTRIS. Withering. This species, the true Forget-me-not of Europe, is cultivated, and possibly spontaneous.]

**Lithospermum**, Tourn. *Gromwell.*
L. ARVENSE, L. West Lebanon, Dr. E. E. Phelps; not often seen.
L. OFFICINALE, L. Roadsides and pastures; both species European weeds.

**Symphytum**, Tourn. *Comfrey.*
S. OFFICINALE, I.. A not common garden escape; from Europe.

**Echium**, Tourn. *Bugloss.*
E. VULGARE, L. (Blue Thistle.) Hanover, N. H.; Pomfret, Sharon, and Royalton, VT. Roadsides and fields; European.

**Mertensia**, Roth. *Lungwort.*
[M. VIRGINICA, DC. (Virginian Cowslip. Blue Bells.) A native of the West and often cultivated.]

**Order 54. CONVOLVULACEÆ.** *Convulvus Family.*

**Ipomœa**, L. *Morning-Glory.*
[L. QUAMOCLIT (Cypress-Vine), I. COCCINEA (Scarlet Morning-Glory), and I. PURPUREA (Common Morning-Glory) are everywhere in gardens.]

**Convulvulus**, Tourn. *Bindweed.*
C. spithæmus, L. (Calystegia spithæmus, Pursh.) Dry fields; Hanover, N. H., Jesup; Norwich, VT., E. D. Kelley.
C. sepium, L. (Calystegia sepium, R. Br.)—(Hedge Bindweed.) Banks of streams and variable.
var. Americanus, Sims, is glabrous and common.
var. repens, Gray, is pubescent.
C. ARVENSIS, L. A smaller procumbent plant and common in old fields.

[A double flowering species, sold by the florists as "CALYSTEGIA PUBESCENS FROM CHINA," when once planted spreads rapidly.]

**Cuscuta**, Tourn. *Dodder.*
C. Gronovii, Willd. Low grounds; parasitic on herbs, etc.; not rare.

**Order 55. SOLANACEÆ.** *Nightshade Family.*

**Solanum**, Tourn. *Nightshade.*
S. DULCAMARA, L. (Bittersweet.) Naturalized from Europe.
S. nigrum, L. (Common Nightshade.) Shaded grounds.

**Physalis**, L. *Ground Cherry.*
P. Virginiana, Mill. (P. viscosa, Gray's Man., 5th ed.) Sandy soils.
P. pubescens, L. An occasional weed; neither species common.
Nicandra, Adans. Apple of Peru.
N. physaloides, Gaertn. In waste ground, but not common. Native of Peru.

Lycium, L. Matrimony-Vine.
L. vulgare, Dunal. Near dwellings where it was once cultivated; European.

Hyoscyamus, Tourn. Henbane.
H. niger, L. Rarely seen; roadsides, etc. From Europe.

D. tatula, L. (Purple Thorn Apple.) Waste heaps. From tropical America.

[Cultivated species of this Order are:—LYCOPERSICUM ESCULENTUM (Tomato), SOLANUM TUBEROSUM (Common Potato), and NICOTIANA TABACUM (Tobacco).]

Order 56. SCROPHULARIACEÆ. Figwort Family.

Verbascum, L. Mullein.
V. thapsus, L. (Common Mullein.) Fields everywhere.
V. Blattaria, L. (Moth Mullein.) Less common, both species European weeds.

Linaria, Tourn. Toad-Flax.
L. canadensis, Dumont. Sandy soil; common.
L. vulgaris, L. (Toad-Flax. Butter and Eggs.) Roadsides; European.

Scrophularia, Tourn. Figwort.

Chelone, Tourn. Turtle-head. Snake-head.
C. glabra, L. Wet places; common.

P. laevis, Solander, var. Digitalis, Gray. (P. Digitalis, Nutt.) Lebanon, perhaps introduced with grass-seed.

Mimulus, L. Monkey-flower.
M. ringens, L. Wet places; common.

Gratiola, L. Hedge-Hyssop.
G. Virginiana, L. Wet places.
G. aurea, Muhl. Margins of ponds. Meriden, Dr. Barrows.

Ilysanthes, Raf. False Pimpernel.
I. riparia, Raf. (I. gratioides, Benth.) Sandy borders of ponds and streams.
Veronica, L. Speedwell.
V. Virginica, L. (Culver’s-root.) Roadsides in rich soil; not common, appearing like a garden escape.
V. Anagallis, L. (Water Speedwell.) Ditches.
V. Americana, Schwein. (American Brooklime.) Brooks and ditches.
V. scutellata, L. (Marsh Speedwell.) Bogs.
V. officinalis, L. (Common Speedwell.) Claremont, Dr. Barrows.
V. serpyllifolia, L. (Thyme-leaved Speedwell.) With grass; common.
V. peregrina, L. (Purslane Speedwell.) A weed in cultivated grounds.
V. ARvensis, L. (Corn Speedwell.) Claremont, Dr. Barrows.
V. BuxBAUMii, Tenore. Hanover; a weed in gardens and lawns.

Gerardia, L. False Foxglove.
G. pedicularia, L. Dry woods. Fairlee Cliffs, Vt., etc.
G. flava, L. (Downy False Foxglove.) Dry woods.
G. quercifolia, Pursh. (Oak-leaved Foxglove.) Wooded hillsides. Fairlee Cliffs, Vt., etc.
G. tenuifolia, Vahl. (Slender Foxglove.) Dry woods. Dr. Barrows.

Pedicularis, Tourn. Lousewort.
P. Canadensis, L. Hanover, etc. Woods and banks.

Melampyrum, Tourn. Cow-Wheat.

Order 57. OROBANCHACEÆ. BROOM-RAPE FAMILY.

Epiphegus, Nutt. Beech-drops.

C. Americana, Wallroth. In old woods. Claremont, N. H., Dr. Graves; [West Rutland, Vt., Denslow, beyond our limits.]

A. uniflorum, Gray. Borders of woods; not rare.

Order 58. LENTIBULARIACEÆ. BLADDERWORT FAMILY.

Utricularia, L. Bladderwort.
U. inflata, Walt. Claremont, Dr. Graves; ponds.
U. vulgaris, L. (Common Bladderwort.) Ponds; common.
U. minor, L. Claremont, Dr. Barrows.
U. gibba, L. Claremont, Dr. Barrows; West Lebanon, Dr. Kennedy.
U. intermedia, Hayne. Marshes and shallow pools; Canaan, etc.; not rare.
U. purpurea, Walt. Goose Pond, Canaan; rare.
Order 59. VERBENACEÆ. Vervain Family.

Verbena, Tourn. Vervain.
V. urchicifolia, L. (White Vervain.) Common.
V. angustifolia, Michx. In an old pasture near Hanover; rare so far north.
V. hastata, L. (Blue Vervain.) Roadsides; common.
[The Verbenas of the gardens are hybrid forms derived from a number of South American species, including one (V. Aubletia) which is indigenous to the West and South.]

Phyrma, L. Lopseed.
P. Leptostachya, L. Woods; common.

Order 60. LABIATÆ. Mint Family.

Trichostema, L. Blue-curls. Bastard Pennyroyal.
T. dichotomum, L. Sandy fields.

Teucrium, Tourn. Germander.
T. Canadense, L. (Wood Sage.) Near Conn. river. Hanover, N. H.; Olcott, Vt.; etc.

Mentha, Tourn. Mint.
M. viridis, L. (Spearmint.) Wet places; common; European.
M. piperita, L. (Peppermint.) Along brooks; frequent; European.
M. Canadensis, L. Like the above, in wet places; common.
M. sativa, L. (Whorled Mint.) Plymouth, Sargent. A garden escape, perhaps.

Lycopterygium, Tourn. Water Horehound.
L. Virginicus, L. (Bugle-weed.) Marshes.
L. sinuatus, Ell. (L. Europæus, L., var. sinuatus, Gray.) Common in wet grounds.

Pycnanthemum, Michx. Mountain Mint.
P. lanceolatum, Pursh. Claremont, Dr. Barrows; not common.
P. incanum, Michx. Claremont, Dr. Barrows; rare.

Origanum, Tourn. Wild Marjoram.
O. vulgare, L. Claremont, Dr. Barrows; rare; from Europe.

Calamintha, Tourn. Calamint.
C. Clinopodium, Benth. (Wild Basil.) Low woods.

Monarda, L. Horse-Mint.
M. didyma, L. In old gardens called “Bee Balm;” infrequent in a wild state.
M. punctata, L. (Horse-Mint.) Claremont, Dr. Barrows; introduced.
M. fistulosa, L., var. mollis, Benth. (Wild Bergamot.) In gardens; indigenous in Vt., Perkins.
CATALOGUE OF PLANTS.

Blephilia, Raf.
B. hirsuta, Benth. Killington Mt., Vt., Denslow.

Nepeta, L.
N. Cataria, L. (Catnip.) Near dwellings.
N. Glechoma, Benth. (Ground Ivy.) Dooryards, etc. Both species European weeds.

Scutellaria, L. Skullcap.
S. lateriflora, L. (Mad-dog Skullcap.) Wet shady places.
S. galericulata, L. With the preceding; both species common.

Brunella, Tourn. Self-heal.
B. vulgaris, L. Fields; common.

Physostegia, Benth. False Dragon-head.

Marrubium, Tourn. Horehound.
M. vulgare, L. Escaped from gardens into waste places; European.

Leonurus, L. Motherwort.
L. Cardiaca, L. Around dwellings; a weed from Europe.

Lamium, L. Dead-Nettle.
L. amplexicaule, L. In cultivated grounds; rare.
L. maculatum, L. A garden escape; both European.

Galeopsis, L. Hemp-Nettle.
G. Tetrahit, L. (Common Hemp-Nettle.) Waste places; common.
G. Ladanum, L. (Red Hemp-Nettle.) Hanover, etc., Flint; rare; both European.

Stachys, Tourn. Hedge-Nettle.
S. palustris, L. Near streams.
S. aspera, Michx. (S. palustris, var. aspera, Gray.) Wet grounds; not uncommon.

[Old gardens furnish other Labiate plants, such as Ocimum Basilicum (Sweet Basil), Lavandula vera (Lavender), Hyssopus officinalis (Hyssop), Thymus Serpyllum (Creeping Thyme), Satureia hortensis (Summer Savory), Melissa officinalis (Balm), Salvia officinalis (Common Sage), etc.;—all from Europe.

Order 6i. PLANTAGINACEÆ. Plantain Family.

Plantago, Tourn. Plantain.
P. Major, L. (Common Plantain.) A European weed.
P. Lanceolata, L. (Rib-grass. English Plantain.) Dooryards and dry fields; common.
CATALOGUE OF PLANTS.

DIVISION III. APETALOUS EXOGENS.

Order 62. **illecebraceae.** Knotwort Family.

(Formerly included in Caryophyllaceæ.)

**Anychia**, Michx. Forked Chickweed.

A. capillacea, DC. (A. dichotoma, var. capillacea, Torr.) Dry woods.

*Geological Survey of N. H.*

**Scleranthus**, L. Knawel.

S. annuus, L. Waste places; from Europe.

Order 63. **amaranthaceae.** Amaranth Family.

**Amaranthus**, Tourn. Amaranth.

A. hypochondriacus, L. (Red Amaranth.) Escaped from gardens.

A. Paniculatus, L. A weed in gardens.

A. retroflexus, L. (Hogweed. Pigweed.) Cultivated ground.

A. chlorostachys, Willd. (A. retroflexus, var. chlorostachys, Gray.)

Cultivated ground.

var. hybridus, Watson. (A. retroflexus, var. hybridus, Gray.) All

the above from tropical America.

A. albus, L. (Tumble Weed.) A coarse weed.

[ Cultivated species of this Order:—**Celosia cristata** (Common Cocks-

comb), and **Gomphrena globosa** (Globe Amaranth); both from India.]

Order 64. **chenopodiaceae.** Goosefoot Family.

C. polyspermum, L. Claremont, Dr. Barrows. European.

C. urbicum, L. Claremont, Dr. Barrows. European.

C. hybridum, L. (Maple-leaved Goosefoot.) Introduced from New York.

C. glaucum, L. (Oak-leaved Goosefoot.) European.

C. Bonus-Henricus, L. (Blitum Bonus-Henricus, Reich.)—(Good King

Henry.) European.

C. capitatum, Watson. (Blitum capitatum, L.)—(Strawberry Blite.)

Around dwellings; infrequent.

C. botrys, L. (Jerusalem Oak.) Claremont, Dr. Barrows; Hanover,

etc.; European.

C. ambrosioides, L. (Mexican Tea.) Claremont, Dr. Barrows; from

tropical America.

**Roubieva**, Moquin.

R. multifida, Moq. (Chenopodium multifidum, L.) Claremont, Dr.

Barrows. All the above plants of this Order are weeds in the vicinity

of cultivated grounds or dwellings.

[ Cultivated species of this Order include:—**Beta vulgaris** (Common

Beet), and **Spinachia oleracea** (Common Spinach), both from Europe.]
Order 65. **PHYTOLACCACEÆ.** Pokeweed Family.

**Phytolacca,** Tourn. Pokeweed.

Order 66. **POLYGONACEÆ.** Buckwheat Family.

[R. *Patientia,* L. (Patience Dock.) This plant of northern Vt., and central Mass., should be within our limits.]

R. verticillatus, L. (Swamp Dock.) Killington Mt., Vt., *Denslow.*
R. *crispus,* L. (Curled Dock.) Very common everywhere.
R. *obtusifolius,* L. (Bitter Dock.) Fields and roadssides.
R. *sanguineus,* L. (Bloody-veined Dock.) Royalton, Vt., etc., *Ward.*
R. *acetosella,* L. (Sheep Sorrel.) The last four are weeds in fields and pastures. European.

**Rheum,** L. Rhubarb.
R. *Rhaponticum,* L. (Garden Rhubarb or Pie Plant.) Escaped from cultivation. Native of Asia.

P. aviculare, L. (Knotgrass.) Roadsides, dooryards, etc. Common.
P. erectum, L. (P. aviculare, var. erectum, Roth.) With the above.
P. tenue, Michx. Dry fields.
P. Pennsylvanicum, L. Fields; very common.
P. *orientale,* L. (Prince’s Feather.) In old gardens; from India.
P. *Persicaria,* L. (Lady’s Thumb.) Fields; European.
P. *hydropiperoides,* Michx. (Water-pepper.) Shallow water.
P. *Hydropiper,* L. (Water-pepper.)
P. *acutum,* HBK. (Water Smartweed.)
P. Virginianum, L. Banks of Conn. river, Windsor, Vt., *Leland.*
P. arifolium, L. (Halberd-leaved Tear-thumb.) Wet grounds.
P. *sagittatum,* L. (Arrow-leaved Tear-thumb.) Wet grounds.
P. *Convolvulus,* L. (Black Bindweed.) Fields; European.
P. *cilinode,* Michx. On fences, etc. Common.
P. dumetorum, L., var. scandens, Gray. (Climbing False Buckwheat.) Common.

[P. Hartwrightii, Gray. (Common in Vt., *Prof. Perkins.*) May belong here.]

**Fagopyrum,** Tourn. Buckwheat.
F. *esculentum,* Moench. (Buckwheat.) Old fields.
F. *Tataricum,* Gaertn. (India Wheat.) Both species cultivated; Asiatic.
Catalogue of Plants.

Asarum, Tourn. Wild Ginger.
A. Canadense, L. Rich woods.

Aristolochia, Tourn. Birthwort.
[A. Siphon, L'Her. (Pipe Vine. Dutchman's Pipe.) A native of Penn. and Va., and sometimes planted for arbors.]

Order 68. Lauraceae. Laurel Family.

Sassafras, Nees.
S. officinale, Nees. Plainfield, N. H., Miss Stevens; Springfield, Vt., Rev. S. Hayward; Charlestown, N. H.; Randolph, Orange, and Pomfret, Vt.; rare; southward it is common.

[L. Benzoin, Blume. A shrub found in Vermont (Prof. Perkins) and probably within our limits.]

Dirca, L. Leatherwood.
D. palustris, L. Rich woods; sometimes in swamps, common.

Daphne, L. Mezereum.
[D. Mezereum, L. An early blooming garden shrub from Europe.]

Order 70. Loranthaceae. Mistletoe Family.

Arceuthobium, Bieb.
A. pusillum, Peck. (Dwarf Mistletoe.) Found parasitic on Picea nigra (Black Spruce) in a swamp in Lebanon (1883); also near Bear Pond, Canaan (1883), Jesup. Probably rare. It is also found in the Adiron-
dack region of N. Y., and is very injurious.

Order 71. Santalaceae. Sandalwood Family.

Comandra, Nutt. Bastard Toad-flax.

Euphorbia, L. Spurge.
E. maculata, L. A common weed in gardens.
E. Preslii, Guss. (E. hypericifolia, Gray's Man., 5th ed.) Roadsides and
gardens.
E. Cyparissias, L. (Cypress Spurge.) Roadsides. Often seen in ceme-
terries.
E. Peplus, L. Dooryards. Hanover, Jesup. The last two are European.
[E. Marginata, Pursh., from the West, is cultivated.]

Acalypha, L. Three-seeded Mercury.
A. Virginica, L. A weed in cultivated ground; frequent.
Ricinus, L. Castor-oil Plant.
   [R. communis, L. Very common in cultivation.]

Order 73. **URTICACEÆ.** Nettle Family.

Ulmus, L. Elm.
   U. fulva, Michx. (Red Elm. Slippery Elm.) Banks of streams; not rare.
   U. Americana, L. (Common Elm. American or White Elm.) Abundant.
   U. racemosa, Thomas. (Corky White Elm.) Meriden, Dr. Barrows, where a few large trees are found, apparently self sown. It is sometimes planted, and at the West is a valuable tree and indigenous.

   C. occidentalis, L. Banks of Conn. river throughout the district, but not abundant.

Cannabis, Tourn.
   C. sativa, L. (Hemp.) Roadsides; escaped from cultivation; European.

Humulus, L. Hopvine.
   H. Lupulus, L. Roadsides; frequent in cultivation.

Urtica, Tourn. Nettle.
   U. gracilis, Ait. (Common Nettle.) Fence rows; common.
   U. urens, L. Claremont, N. H., Dr. Barrows; Royalton, Vt., Ward; scarce.

Laportea, Gaudichaud.

Pilea, Lindl.
   P. pumila, Gray. (Clearweed.) In shady places near dwellings.

Boehmeria, Jacq. False Nettle.
   B. cylindrica, Willd. Shady and moist ground.

   [Morus rubra, L., the Red Mulberry tree, is a native of central New England. Morus nigra from the Levant with black fruit, and the white-fruited Morus alba from China are occasionally planted.]

Order 74. **PLATANACEÆ.** Plane-tree Family.

Platanus, L. Plane-Tree.
   P. occidentalis, L. (Buttonwood or American Sycamore.) Meriden and Hanover, N. H.; Hartford, Hartland, and Sharon, Vt. Not abundant so far north, and commonly planted.

Order 75. **JUGLANDACEÆ.** Walnut Family.

Juglans, L. Walnut.
   J. cinerea, L. (Butternut.) Very common.

   [J. nigra, L., the Black Walnut of the West, is often seen in private grounds.]
CATALOGUE OF PLANTS.

Carya, Nutt. Hickory.
C. alba, Nutt. (Shell-bark Hickory.) Claremont, N. H., Dr. Barrows; Royalton, Vt., L. Wild.
C. porcina, Nutt. (Pig-nut. Hog Walnut.) Common.
C. amara, Nutt. (Bitter-nut.) Claremont and Lebanon, Dr. Barrows.
“Along the Conn. river on both sides,” Flint.

Order 76. MYRICACEÆ. Sweet-Gale Family.

Myrica, L.
M. Gale, L. (Sweet Gale.) Swamps; Hanover, Sunapee Lake, etc.; not uncommon.
M. asplenifolia, Endl. (Comptonia asplenifolia, Ait.)—(Sweet Fern.) Dry hills; common.

Order 77. CUPULIFERÆ. Oak Family.

(Including Betulaceæ, The Birch Family.)

Betula, Tourn. Birch.
B. lenta, L. (Black or Cherry Birch.) Throughout our limits, but less common north of Hanover.
B. lutea, Michx. f. (Yellow Birch.) Common.
B. populifolia, Ait. (B. alba, var. populifolia, Spach.)—(American White Birch. Gray Birch.) Not abundant, but very common in the centre of the state.
B. alba, L. (European White Birch.) Introduced at Hanover, where it spreads rapidly.

Alnus, Tourn. Alder.
A. viridis, DC. (Green or Mountain Alder.) Banks of Conn. river, Hanover, etc.
A. incana, Willd. (Speckled Alder.) Common northward.
A. serrulata, Ait. (Smooth Alder.) Claremont, Dr. Graves. More abundant southward.

Corylus, Tourn. Hazelnut.
C. rostrata, Ait. (Beaked Hazelnut.) Common.
C. Americana, Walt. (Wild Hazelnut.) Hartford, Vt., and Hanover, N. H.; not uncommon.

Ostrya, Micheli. Hop-Hornbeam.

C. Caroliniana, Walt. (C. Americana, Michx.)—(American Hornbeam. Blue or Water Beech.) Common.

Quercus, L. Oak.
Q. alba, L. (White Oak.) More or less common on both sides of the Conn. river.
Q. coccinea, Wang., var. tinctoria, Gray. (Black Oak.) North Charlestown, Flint; and in a few towns in both states.
Q. rubra, L. (Red Oak.) The most abundant species. Other species on our borders may yet be found within our limits.

**Castanea**, Tourn. Chestnut.
C. sativa, Mill., var. Americana. (C. vesca, var. Gray’s Man., 5th ed.) Infrequent. Claremont is nearly the northern limit; frequently planted and growing well in sheltered places.

**Fagus**, Tourn. Beech.
F. ferruginea, Ait. Varies greatly; wood light colored or reddish, as growing on dry or moist ground. Abundant.

**Order 78. SALICACEÆ. Willow Family.**

**Salix**, Tourn. Willow.
S. nigra, Marsh. (Black Willow.) The only native species tree-like in size.
S. lucida, Muhl. (Shining Willow.) Wet places; very handsome shrub.
S. FRAGILIS, L. (Brittle Willow.) Large tree; from Europe; early introduced.
S. ALBA, L. (White Willow.) Both this and the above with many varieties, and hybrid forms.
S. BABYLONICA, Tourn. (Weeping Willow.) From Asia, and here known only in the pistillate form.
S. discolor, Muhl. (Glaucous Willow.) Very common everywhere.
S. humilis, Marsh. (Prairie Willow.) Dry ground; common.
S. tristis, Ait. (Dwarf Gray Willow.) With the above.
S. sericea, Marsh. (Silky Willow.) Not rare.
S. petiolaris, Smith. With the preceding.
S. PURPUREA, L. (Purple Willow.) From Europe; used for basket-work.
S. cordata, Muhl. (Heart-leaved Willow.) Very common and variable.

[In addition to the above, other species may occur on our mountains and elsewhere. Numerous hybrid forms have been noted, making the precise determination of the species at times impracticable. **SALIX FRAGILIS** and **S. ALBA** are much intercrossed. **S. DISCOLOR** and **S. HUMILIS** hybridize, and small forms of the latter are not readily distinguished from **S. TRISTIS**. See description of Genus in Manual, 6th ed. by M. S. Bebb.]

[P. ALBA, L. (White Poplar. Abele Tree.) Cultivated from Europe, and in the pistillate form only.]
P. tremuloides, Michx. (American Aspen.) Everywhere common.
P. grandidentata, Michx. (Great-toothed Poplar.) Frequent.
P. balsamifera, L. (Balsam Poplar.) Abundant near streams.
var. CANDICANS, Gray. (Balm of Gilead.) Commonly cultivated; never spontaneous within this district, and perhaps European.
[P. monilifera, Ait. (Cotton-wood.) In cultivation from the West; rarely spontaneous]
[P. dilatata, Ait. (Lombardy Poplar.) From Europe, in the pistillate form only, and freely spreading by suckers.]

Order 79. EMPETRACEÆ. Crowberry Family.

Empetrum, Tourn. Crowberry.
E. nigrum, L. (Black Crowberry.) Moosilauke Mt., Rev. J. Blake.

Order 80. CERATOPHYLLACEÆ. Hornwort Family.

Ceratophyllum, L. Hornwort.
Subclass II. **GYMNOSPERMAE.**

**Order 81. CONIFERÆ. Pine Family.**

- *P. Strobus, L.* (White Pine.) Very common; the most valuable species.
- *P. rigida, Miller.* (Pitch Pine.) Sandy soil; more common farther south.
- *P. resinosa, Ait.* (Red or Norway Pine.) Sparingly found throughout our limits. “It is not a native of Europe, but was named from the town of Norway in Maine.” *Robert Douglass.*
- *P. sylvestris, L.* (Scotch Pine. Scotch Fir.) Already spontaneous in Hanover.

**Picea**, Link. Spruce.
- *P. nigra, Link.* (Abies nigra, Poir.)—(Black Spruce.) Swamps and cold mountain woods; common.
  - var. rubra, Engelm. With the above, “cones larger, bright red-brown.” Better timber than the type, and called by some lumbermen “Yellow Spruce.”
- *P. alba, Link.* (Abies alba, Michx.)—(White Spruce.) Newport, N. H.; Dr. Graves; Windsor, Vt.; Leland; Killington Mt., Vt., Denslow; and more or less throughout our limits.

**Tsuga**, Carrière. Hemlock.
- *T. Canadensis, Carr.* (Abies Canadensis, Michx.)—(Hemlock.) Common.

**Abies**, Link. Fir.
- *A. balsamea, Miller.* (Balsam Fir.) Damp woods and mountain swamps; common.

**Larix**, Tourn. Larch.
- *L. Americana, Michx.* (American Larch. Tamarack. Hackmatack.) Cold swamps; common.
- *L. Europæa, L.* (European Larch.) Widely planted, and in Hanover spreading freely.

**Thuva**, Tourn. Arbor Vitæ.

**Juniperus**, L. Juniper.
- *J. communis, L.* (Common Juniper.) Claremont (Dr. Barrows), Hanover, Orford, Enfield, Sutton, etc., N. H.; Pomfret, Orange, Williamstown, Vt.; etc.
- *J. Virginiana, L.* (Red Cedar.) Hanover, N. H.; Fairlee, Vt., F. O. Grover; and in many places in the district, but not common.

[Among evergreens in cultivation will be found:—*Pinus Austriaca* (Austrian Pine), *Picea excelsa* (Norway Spruce), *Abies pectinata* (European Silver Fir), etc.]
CLASS II. MONOCOTYLEDONOUS OR ENDOGENOUS PLANTS.

Order 82. **HYDROCHARIDACEÆ.** Frog’s-bit Family.

E. Canadensis, Michx. (Anacharis Canadensis, Planchon.) Found in slow streams and ponds. In a pool near Conn. river, Norwich, Vt.; Dr. Blanchard; and doubtless elsewhere within our limits.

V. spiralis, L. Hanover, N. H., in Conn. river; Fairlee Pond, Vt.; etc.

Order 83. **ORTHIDACEÆ.** Orchis Family.

**Microstylis**, Nutt. Adder’s-Mouth.  
M. monophyllos, Lindl. Hanover, N. H.; Pomfret, Union Village, and Ascutney Mt., Vt.  

**Liparis**, Richard. Twayblade.  
L. Læselli, Richard. Bogs and hillside pastures, Hanover, Meriden, Plymouth, etc.; not rare.

**Calypso**, Salisb. Calypso.  
[C. borealis, Salisb. This rare and local plant of northern Vermont, one of the most beautiful of its Order, is said by Dr. Blanchard to be found in cold cedar swamps throughout Caledonia and Essex counties. He has himself collected it in Ryegate, Barnet, and Peacham, just beyond our northern limits, and it can hardly fail of being within these limits.]

**Corallorrhiza**, Haller. Coral-root.  
C. innata, R. Br. Damp woods; not rare.  
C. odontorrhiza, Nutt. Norwich, Vt.; rare.  
C. multiflora, Nutt. Rich woods. Hanover, etc., and on both sides of the Conn. river.

L. cordata, R. Br. Moosilauke Mt., N. H., Flint; Killington Mt., Vt., Denslow.  
L. convallarioides, Nutt. Mountain bogs.

**Spiranthes**, Richard. Ladies’ Tresses.  

S. cernua, Richard. Wet meadows; common.

S. gracilis, Big. Sandy soil. Hanover and Plymouth, N. H.; Norwich and Royalton, Vt.; etc.; not rare.

Goodyera, R. Br. Rattlesnake-Plantain.

G. repens, R. Br. In rich woods; not rare.

G. pubescens, R. Br. Rich woods; frequent.

Arethusa, Gronov. Arethusa.

A. bulbosa, L. Near Goose Pond in Canaan, N. H., Dr. Barrows; Peat bogs, Hanover, N. H., Jesup; Pine Hill Ponds, Rutland, Vt., Denslow; rare.

C. pulchellus, R. Br. Bogs and moist pastures.

Pogonia, Juss. Pogonia.

P. ophioglossoides, Nutt. Bogs. Bear and Mud Ponds, Canaan; George Pond, Enfield; Hanover, etc., N. H.; Waterman's Pond near Union Village, Vt.; etc.

Orchis, L.

O. spectabilis, L. (Showy Orchis.) Rich woods; not rare.

[O. rotundifolia, Pursh. (Habenaria rotundifolia, Richard.) Sphagnous bogs, Perkins's Vermont Flora. This rare species is likely to occur on our northern borders.]

Habenaria, Willd. Rein-Orchis.

H. virescens, Spreng. (Greenish Orchis.) Claremont, Dr. Barrows.

H. bracteata, R. Br. (H. viridis, var. bracteata, Reichenb.)—(Bracted Green Orchis.) Rich woods.

H. hyperborea, R. Br. (Northern Green Orchis.) Cold bogs, also wet woods.

H. dilatata, Gray. (Northern White Orchis.) Pomfret, Sharon, Norwich, Windsor, and Killington Mt., Vt.; Hanover, N. H.; etc. Wet grounds.

H. orbiculata, Torr. (Larger Round-leaved Orchis.) Mountain woods; not uncommon.

H. blephariglottis, Torr. (White Fringed Orchis.) Grantham Mt., and New London, N. H.; Royalton, Vt.; etc.

H. lacera, R. Br. Moist ground; common.

H. psycodes, Gray. (Purple Fringed Orchis.) Swamps; more common than the next.

H. fimbriata, R. Br. (Purple Fringed Orchis.) Claremont, Dr. Barrows; New London, Sargent. Spike not so dense, and flowers larger than the preceding, and blooming two weeks earlier.
Cypripedium, L. Lady’s Slipper. Moccasin-Flower.
C. arietinum, R. Br. (Ram’s-Head. Lady’s Slipper.) Ascutney Mt., Vt., Dr. Phelps; Lyme, N. H., R. S. Alden; Hanover, N. H., near Olcott Falls, E. P. Barrows; very rare.
C. parviflorum, Salisb. (Smaller Yellow Lady’s Slipper.) Sometimes with the next, but not readily distinguished from it.
C. pubescens, Willd. (Larger Yellow Lady’s Slipper.) Hanover, N. H.; Norwich, Vt.; frequent.
C. spectabile, Swartz. (Showy Lady’s Slipper.) Swamps. Hanover, N. H., F. H. Herrick; Lebanon, N. H., Dr. Barrows; Sharon, Vt., Dr. Baxter; Barnard, Vt., Ward. Not very abundant.
C. acaule, Ait. (Stemless Lady’s Slipper.) Dry or moist woods; common.

Order 84. Iridaceae. Iris Family.

Iris, Tourn. Blue-Flag.
I. versicolor. L. Swamps; common.

Sisyrinchium, L. Blue-eyed Grass.
S. angustifolium, Mill. (S. Bermudiana, var. mucronatum, Gray.) Moist meadows; common.
S. anceps, Cav. (S. Bermudiana, var. anceps, Gray.) Same range as the above.

[Garden plants of this Order belong to the following Genera:—Iris, Tigridia (Tiger-flower), Gladiolus (Sword Lily), and Crocus.]

Order 85. Liliaceae. Lily Family.

S. herbacea, L. (Carrion Flower.) River-banks; not infrequent.
S. rotundifolia, L. (Greenbrier.) Thickets; not common.

Allium, L. Onion.
A. tricoccum, Ait. (Wild Leek.) Rich woods; frequent on both sides of the Conn. river.
A. Schœnoprasum, L. (Chives.) Banks of the Conn. river at Windsor, Vt., Leland. In old gardens.
A. Canadense, Kalm. (Wild Garlic.) Moist meadows.

Ornithogalum, Tourn. Star-of-Bethlehem.
O. umbellatum, L. Dooryards; common; European.

Hemerocallis, L. Day-lily.
H. fulva, L. Road-sides, frequent and well established; from Europe.

Convallaria, L. Lily of the Valley.
[C. majalis, L. Common in gardens; a native of Virginia, and sometimes escaping to the roadsides. Our plant is of European origin.]

Polygonatum, Tourn. Solomon’s Seal.
P. biflorum, Ell. (Common Solomon’s Seal.) Wooded banks and hillsides; common.
P. giganteum, Dietrich. (Great Solomon's Seal.) River-banks; rare; Hartford, Vt., Ward.

Asparagus, Tourn. Asparagus.
A. officinalis, L. A common garden escape; European.

Smilacina, Desf. False Solomon's Seal.
S. racemosa, Desf. (False Spikenard.) Moist copses.
S. stellata, Desf. Both banks of Conn. river; Plymouth, Miss Langdon; etc.
S. trifolia, Desf. Sphagnous swamps; somewhat rare.

Maianthemum, Wigg.
M. Canadense, Desf. (Smilacina bifolia, var. Canadensis, Gray.) Moist woods; very common.

Streptopus, Michx. Twist-Foot. Twisted-Stalk.
S. amplexifolius, DC. Claremont, Groton, Cube Mt., and Moosilauke Mt., N. H.; Pomfret and Killington Mt., Vt.; etc.
S. roseus, Michx. Frequent in damp woods.

Clintonia, Raf. Clintonia.
C. borealis, Raf. Moist woods; common.

Uvularia, L. Bellwort.
U. perfoliata, L. Claremont, Dr. Barrows; scarce.

Erythronium, L. Adder's-Tongue.
E. Americanum, Ker. (Yellow Adder's-Tongue.) Very common in rich woodlands.

Lilium, L. Lily.
L. Philadelphicum, L. (Orange Lily.) Common in sandy, open woods.
L. Canadense, L. (Yellow Lily.) Moist meadows; very abundant.
[L. Tigrinum, Ker. (Tiger Lily.) Sometimes spontaneous on the roadside. From Eastern Asia.]

Medeola, Gronov. Indian Cucumber-root.
M. Virginiana, L. Rich moist woods; common.

T. erectum, L. (Early Trillium.) Common in rich woods.
var. album, Pursh. Hartford, Vt., C. H. Hazen; Chittenden, Vt., abundant, Flint. Found with the type.
T. grandiflorum, Salisb. (Large-flowered Trillium.) The finest species of the genus, and common in Vermont west of the Green Mts. It has been reported from Woodstock and Thetford, Vt., and should be looked for elsewhere on our western border.
T. erythocarpum, Michx. (Painted Trillium.) Moist woods; common.
Tofieldia, Hudson. False Asphodel.
T. glutinosa, Willd. Quechee Gulf, Vt., Leland; very rare.

Veratrum, Tourn. False Hellebore.
V. viride, Ait. (American White Hellebore. Indian Poke.) Low grounds; common.

[The following Liliaceous plants are found in gardens:—Colchicum autumale from Europe, Lilium of many species from Europe and the East, Fritillaria imperialis (Crown Imperial) from Asia, Tulipa gesneriana (Common Tulip of many varieties) also Asiatic, Scilla (Squill) of several European species, Muscari botryoides (Grape Hyacinth) from Europe, Hyacinthus orientalis (Common Hyacinth) of the Levant, Funkia (Day Lily) from Europe and the East, Yucca filamentos of the south-western United States, etc.]

Order 86. Pontederiaceae. Pickerel-weed Family.

Pontederia, L. Pickerel-weed.
P. cordata, L. Ponds; common and trimorphous.

Order 87. Xyridaceae. Yellow-eyed-grass Family.

Xyris, Gronov. Yellow-eyed Grass.
X. flexuosa, Muhl. The typical form not yet reported.
var. pusilla, Gray. Sandy margins of streams and ponds. Meriden, Canaan, etc., Jesup.

Juncus, Tourn. Rush.
J. effusus, L. Marshes. A large and very common species.
J. filiformis, L. Low grounds, not very rare.
J. trifidus, L. Moosilauke Mt., Rev. J. Blake.
J. marginatus, Rostk. Sands of Conn. river.
J. Greenii, O. & T. Haverhill, Flint.
J. bufonius, L. (Toad Rush.) Roadsides.
J. pelocarpus, E. Meyer. Shores of Enfield Pond, Jesup.
J. articulatus, L. Wet grounds.
J. acuminatus, Michx. Wet places; common and very variable.
J. nodosus, L. Swamps and banks of streams.
J. Canadensis, J. Gay. Common; a late blooming species.
var. longicaudatus. Engelm.
var. coarctatus, Engelm.

Luzula, DC. Wood-Rush.
L. vernalis, DC. (L. pilosa, Willd.) Hanover, A. C. French; Canaan, Dr. Barrows; not uncommon.
L. spadicea, DC., var. melanocarpa, Meyer. (L. parviflora, var. melano-
carpa, Gray.) Moosilauke Mt., Rev. J. Blake.
L. campestris, DC. Meadows; common.
Order 89. **TYPHACEÆ.** Cat-tail Family.

**Typha,** Tourn.  
*T. latifolia,* L. (Common Cat-tail.)

**Sparganium,** Tourn. Bur-reed.  
*S. simplex,* Huds. Borders of ponds and streams.  
var. *androcladum,* Engelm. The largest form; common.  
var. *fluitans,* Engelm. Not uncommon in ponds and streams.  
var. *angustifolium,* Engelm. In ponds.  
*S. minimum,* Fries. Pond holes, Norwich, Vt., *Jesup*; probably not rare.

Order 90. **ARACEÆ.** Arum Family.

**Arisaema,** Martius.  
*A. triphyllum,* Torr. (Indian Turnip.) Common in rich woods.  
*A. Dracontium,* Schott. (Dragon Arum.) Charlestown, *Dr. Graves*; rare.

**Peltandra,** Raf. Arrow Arum.  

**Calla,** L. Water Arum.  

**Symplocarpus,** Salisb. Skunk Cabbage.  
*S. foetidus,* Salisb. Wet places. Norwich and Thetford, Vt.; etc. Not as common as it is farther south.

**Acorus,** L. Sweet Flag. Calamus.  
*A. Calamus,* L. Swamps; everywhere.

Order 91. **LEMNACEÆ.** Duckweed Family.

**Lemna,** L. Duckweed.  
*L. minor,* L. Floating in still water; not infrequent in ponds and ditches. Hanover and Enfield, N. H.; Norwich, Vt.; etc.

**Spirodela,** Schleid. Duckweed.  
*S. polyrrhiza,* Schleid. (*Lemna polyrrhiza,* L.) In the same localities as the preceding, and like it rarely ever found in flower or fruit; propagating by winter buds. This species is less common than the preceding.

Order 92. **ALISMACEÆ.** Water-Plantain Family.

**Alisma,** L. Water-Plantain.  
*A. Plantago,* L. Shallow water; abundant and variable.

**Sagittaria,** L. Arrow-head.  
*S. variabilis,* Engelm. In wet places; several varieties.  
*S. graminea,* Michx. Lebanon, Hanover, etc.; not rare near ponds.

**Scheuchzeria**, L.
S. palustris, L. Cranberry Pond on Grantham Mt., N. H.; Waterman's Pond near Union Village, Vt.; etc.; Jesup.

P. natans, L. Ponds and streams.
P. Oakesianus, Robbins. Cranberry Pond on Grantham Mt.
P. Pennsylvanicus, Cham. (P. Claytonii, Tuckerm.) Common in ponds and streams.
P. Spirillus, Tuckerm. Streams and ponds.
P. hybridus, Michx. Shallow ponds.
P. rufescens, Schrad. Windsor, Vt.; infrequent.
P. fluïtans, Roth. (P. lonchites, Tuck.) Conn. river; common.
P. amplifolius, Tuckerm. Ponds and large rivers.
P. heterophyllus, Schreb. (P. gramineus, Fries.) Conn. river; common and variable.
P. perfoliatus, L. Conn. river; common.
  var. lanceolatus, Robbins. Conn. river.
P. pauciflorus, Pursh. Pools.
P. pusillus, L. Shallow pools; not rare.
P. Tuckermani, Robbins. Claremont, *Dr. Barrows*; scarce.
P. pectinatus, L. In Conn. river; abundant.
[Other species than the above are probably within our limits.]

Z. palustris, L. Ponds. Claremont, *Dr. Barrows*; scarce.

**Naias**, L. Naiad.
N. flexilis, Rostk. & Schmidt. Ponds; rather common.

Order 94. *ERIOCAULEAE*. Pipewort Family.

**Ericaulon**, L. Pipewort.
E. septangulare, With. Sandy borders of ponds; common.

Order 95. *CYPERACEAE*. Sedge Family.

**Cyperus**, Tourn. Galingale.
C. diandrus, Torr. Low ground, and variable.
C. aristatus, Rottb. (C. inflexus, Muhl.) Shores of Conn. river.
C. filiculmis, Vahl. Dry, sterile soil; common.
C. esculentus, L. (C. phymatodes, Muhl.) Low ground, spreading by root-like tubers.
C. strigosus, L. Very common.
CATALOGUE OF PLANTS.

Dulichium, Pers.
D. spathaceum, Pers. Marshes; common.

Eleocharis, R. Br. Spike-Rush.
E. Robbinsonii, Oakes. In ponds, rather rare; George Pond, Enfield; etc.
E. ovata, R. Br. (E. obtusa, Schultes.) Wet places.
E. palustris, R. Br. Wet places, and very variable in size, etc.
E. tenuis, Schultes. Wet places; very common.
E. acicularis, R. Br. Muddy shores; abundant.

Fimbristylis, Vahl.
F. autumnalis, Roem. & Schultes. Low grounds.
F. capillaris, Gray. Sandy fields.

Scirpus, Tourn. Bulrush or Club-Rush.
S. debilis, Pursh. Near ponds throughout the district.
S. sylvaticus, L., var. digynus, Boeckl. (S. microcarpus, Presl.) Along brooks; common.
S. atrovirens, Muhl. Wet meadows; common.

Eriophorum, L. Cotton-Grass.
E. cyperinum, L. (Scirpus Eriophorum, Michx.) Wet meadows; quite variable; lateral spikelets sometimes long pedicelled.
E. alpinum, L. Cold bogs. Not rare; an early species.
E. vaginatum, L. Peat bogs, Lebanon; not very common.
E. Virginicum, L. Low meadows; a variety has white wool.
E. polystachyon, L. Low meadows. Somewhat variable; very common.
E. gracile, Koch. Low meadows; frequent.

R. fusca, Roem. & Schultes. Cranberry Pond on Grantham Mt.; rare.
R. alba, Vahl. Bogs; common.
R. glomerata, Vahl. Low grounds; common.

Carex, Ruppius. Sedge.
C. aquatilis, Wahl. (35) Low grounds, Dr. Barrows.
C. arctica, Boott. (51) Woods; common.
C. aurea, Nutt. (79) Moist banks; not rare.
C. bromoides, Schk. (124) Bogs; common.
C. bullata, Schk. (14) Canaan, Dr. Barrows; rare.
C. canescens, L. (119) Swamps; common.

1 The number following each name refers to its position in Gray's Manual of Botany, 6th edition.
var. vulgaris, Bailey.
var. alpicola, Wahl. (C. vitilis, Fries.)
C. castanea, Wahl. (49)—(C. flexilis, Rudge.) Pomfret, Vt., Morgan.
C. cephalophora, Muhl. (114) Fields; very abundant.
C. communis, Bailey. (89)—(C. varia of Man., 5th ed.) Hillsides; common.
C. conoidea, Schk. (65) Moist meadows.
C. crinita, Lam. (41)—(C. gynandra, Schk. and C. sterilis, Willd.)
C. debilis, Michx., var. Rudgei, Bailey. (52)—(C. debilis, Man., 5th ed.)
C. Deweyana, Schw. (123) Woods and clearings; frequent.
C. digitalis, Willd. (69) Hillsides.
C. echinata, Murray, var. microstachys, Boeckl. (118)—(C. scirpoides, Schk.
and C. sterilis, Willd.)
C. filiformis, L. (27) Peat bogs; frequent.
var. latifolia, Boeckl. (C. lanuginosa. Michx.) Low meadows; common.
C. flava, L. (62) Wet meadows; common.
var. viridula, Bailey. (C. Ederi, Ehrh.) Vermont:—banks of White
River, Flint; Fairlee Lake, Blanchard; Pomfret, Morgan.
C. fœnea, Willd. (130)—(C. adusta, Boott.) In clearings. Claremont,
etc., Jesup.
C. folliculata, L. (4) Bogs; frequent.
C. formosa, Dewey. (56) Claremont, Dr. Barrows.
C. gracillima, Schw. (55) Wet meadows; abundant.
C. granularis, Muhl. (60) Lebanon, N. H., Dr. Barrows; in Vermont
also, Dr. Blanchard.
C. grisea, Wahl. (58) Moist grounds.
C. hystricina, Muhl. (18) Wet meadows; frequent.
C. intumescent, Rudge. (5) Swamps; very common.
C. laxiculmis, Schw. (70)—(C. retrocurva, Dewey.) Woods.
C. laxiflora, Lam. (68) Woods; several varieties; common.
C. lenticularis, Michx. (36) Shores of Enfield Pond, Dr. Kennedy; Baker's
Pond, Orford, Grover.
C. limosa, L. (45) Peat bogs; not uncommon.
C. longirostris, Torr. (48) Lebanon, H. C. Fall. Frequent.
C. lupulina, Muhl. (7) Wet grounds; rather common, and variable.
C. lurida, Wahl. (16)—(C. tentaculata, Muhl.) Meadows; very common,
and variable; hybridizes with the preceding.
C. Magellanica, Lam. (43)—(C. irrigua, Smith.) Norwich, Vt.; bogs.
C. monile, Tuckerm. (12) Moist grounds; frequent.
C. Muhlenbergii, Schk. (112) Sterile soil.
C. pallescens, L. (63) Meadows; common.
C. pauciflora, Lightf. (1) Sphagnous bogs. Plainfield, Dr. Barrows. Rare.
C. pedunculata, Muhl. (82)  Dry woods; common.
C. Pennsylvanica, Lam. (88)  Woods and hillsides; very common, and blooming early.
C. plantaginea, Lam. (74)  Rich hillside woods; common.
C. platyphylla, Carey. (72)  Rich hillside woods; common.
C. polytrichoides, Muhl. (96)  Swamps; abundant.
C. prasina, Wahl. (39)—(C. miliacea, Muhl.)  Bogs; not common. Borders of streams, Dr. Barrows.
C. Pseudo-Cyperus, L. (19)  Goose Pond in Canaan, Dr. Barrows.
    var. Americana, Hochst. (C. comosa, Boott.)  Wet places.
C. pubescens, Muhl. (92)  Lebanon, Dr. Barrows.
C. retrorsa, Schw. (15)  Marshes, near streams.
    var. Hartii, Gray.  Frequent.
C. riparia, Curtis. (29)  Borders of ponds, etc.; common.
C. rosea, Schk. (110)  Woods and meadows; very variable.
C. scabrata, Schw. (23)  Swamps; common.
C. scoparia, Schk. (128)  Meadows; common and variable.
C. sparganioides, Muhl. (111)  Low grounds; frequent.
C. stipata, Muhl. (101)  Low grounds; common.
C. straminea, Willd. (132)—(C. straminea, var. tenera, 5th ed. of Man.)
    Copses and fields; extremely variable. (See Manual.)
C. stricta, Lam. (34)  Wet meadows; very abundant.
    var. decora, Bailey. (C. aperta, Boott.)  Not as common as the type.
C. tenella, Schk. (109)  Cold swamps; common.
C. teretiuscula, Gooden. (104)  Norwich, Vt.; swamps.
C. torta, Boott. (37)  Banks of streams; not rare.
C. tribuloides, Wahl. (127)  (C. lagopodioides, Schk.)  Wet grounds;
    many varieties.
    var. cristata, Bailey. (C. cristata, Schw.)  Moist grounds.
C. trisperma, Dewey. (122)  Cold bogs; common.
C. Tuckermanni, Dewey. (13)  Swamps; not uncommon.
C. umbellata, Schk. (90)  Rocky hillsides.
C. utriculata, Boott. (11)  Swamps; common, and variable.
C. varia, Muhl. (86)—(C. Emmonsii, Dew.)  Woods and hillsides.
    var. colorata, Bailey.  With the type.
C. virescens, Muhl. (46)  Rocky woods.
C. vulgaris, Fries. (33)  Claremont, Dr. Barrows.
C. vulpinoidea, Michx. (107)  Low meadows; abundant.

Paspalum, L.
    P. setaceum, Michx.  Sandy fields.

Panicum, L. Panic-Grass.
    P. glabrum, Gaudin. (Smooth Crab-Grass.)  Gravelly soil. This and the next are European weeds.
    P. sanguinale, L. (Crab-Grass. Finger-Grass.)  Too common.
P. capillare, L. (Old-witch Grass.) In dry soil, everywhere.
P. virgatum, L. (Tall Panic-Grass.) River-banks, etc.; frequent.
P. xanthophyllum, Gray. (Yellow Panic-Grass.) Claremont, Dr. Barrows; Hanover and Lebanon; rare.
P. latifolium, L. (Broad-leaved Panic-Grass.) Low thickets; frequent.
P. depauperatum, Muhl. Dry woods; frequent.
P. clandestinum, L. Moist thickets; common.
P. dichotomum, L. Many varieties and abundant.
P. laxiflorum, Lam. Resembles the preceding, and found with it.
P. Crus-galli, L. (Barnyard-Grass.) On waste heaps and in rich soil; very variable as to size and hairiness. From Europe.

Setaria, Beauv. Bristly Foxtail Grass.
S. verticillata, Beauv. Claremont, Dr. Barrows; not common. All the species are European.
S. glauca, Beauv. (Foxtail.) Cultivated grounds; common.
S. viridis, Beauv. (Green Foxtail.) With the preceding.
S. Italica, Kunth. (Millet. Hungarian Grass.) Rarely spontaneous.

Cenchrus, L. Bur-Grass. Hedgehog-Grass.
C. tribuloides, L. Sandy soil; the burs prickly, with sharp barbed spines.

Leersia, Swartz. White Grass.
L. Virginica, Willd. (White Grass.) Wet woods; frequent.
L. oxyzoides, Swartz. (Rice Cut-Grass.) Marshes, and common.

Andropogon, Royen. Beard-Grass.
A. furcatus, Muhl. (Blue stem.) Dry and sterile soil; common.
A. scoparius, Michx. (Broom-grass.) Like the last, and with the same range.

Chrysopogon, Trin.
C. nutans, Benth. (Sorghum nutans, Gray.)—(Indian Grass. Wood-Grass.) Dry soil; with the preceding species.

Phalaris, L. Canary-Grass.
P. arundinacea, L. (Reed Canary-Grass.) Wet grounds; common.
var. picta, from Europe, is the Ribbon-Grass of gardens.

Anthoxanthum, L.
A. odoratum, L. (Sweet Vernal-Grass.) Meadows; from Europe.

Hierochloe, Gmelin. Holy-Grass.
H. borealis, Roem. & Schultes. (Vanilla or Seneca Grass.) Hanover, etc., Flint; rare.

Aristida, L. Triple-awned Grass.
A. dichotoma, Michx. (Poverty-Grass.) Sandy soil.

Oryzopsis, Michx. Mountain Rice.
O. melanocarpa, Muhl. (Black Mountain Rice.) Rocky woods; blooming in May; common.
O. asperifolia, Michx. (White Mountain Rice.) This and the next less common than the first species.
O. Canadensis, Torr. (Canadian Mountain Rice.) Hills and dry plains.

Milium, Tourn.  
M. effusum, L. (Millet-Grass.) Damp woods; frequent.

Muhlenbergia, Schreber. Drop-seed Grass.  
M. sobolifera, Trin. Rocky woods; frequent.  
M. glomerata, Trin. (Spiked Muhlenbergia.) Wet banks; not rare.  
M.Mexicana, Trin. (Mexican Muhlenbergia.) Common everywhere.  
M. sylvatica, Torr. & Gray. (Wood Muhlenbergia.) Rocky woods; rather scarce.

Brachyelytrum, Beauv.  
B. aristatum, Beauv. Rocky woods; very common.

Phleum, L. Cat's-tail Grass.  

Alopecurus, L. Foxtail Grass.  
A. pratensis, L. (Meadow Foxtail.) Claremont, Dr. Barrows; moist meadows.  
A. geniculatus, L. (Floating Foxtail.) Claremont, Dr. Barrows. This and the above, European.  
var. aristulatus, Torr. (A. aristulatus, Michx.) A native form found in wet places. Neither the species nor the variety is common.

Sporobolus, R. Br. Drop-seed Grass, Rush-Grass.  
S. vaginæflorus, Vasey. (Vilfa vaginæflora, Torr.) Barren fields.  
S. serotinus, Gray. Wet places; common.

Agrostis, L. Bent-Grass.  
A. alba, L. (White Bent-Grass.) Cultivated from Europe.  
var. vulgaris, Thurb. (Common Red-top. Herd’s-Grass of Penn.) Naturalized from Europe. The type and the variety are both good grasses, but cannot always be distinguished.  
A. perennans, Tuckerm. (Thin-Grass.) In damp shade.  
A. scabra, Willd. (Hair-Grass.) Dry places; common.  
A. canina, L. (Brown Bent-Grass.) Meadows.

Cinna, L. Wood Reed-Grass.  
C. arundinacea, L. Moist woods; frequent.  
C. pendula, Trin. (C. arundinacea, var. pendula, Gray.) Wet rocks.

Calamagrostis, Adans. Reed Bent-Grass.  
C. Canadensis, Beauv. (Deyeuxia Canadensis, Hook.)—(Blue-Joint Grass.) Wet grounds; a good grass.  
C. Nuttalliana, Steud. (Deyeuxia Nuttalliana, Vasey.) Windsor, Vt., Leland; rare.  
C. Langsdorffii, Trin. (Deyeuxia Langsdorffii, Kunth.) Moosilauke Mt.

Arrhenatherum, Beauv. Oat-Grass.  
A. avenaceum, Beauv. Windsor, Vt., Leland; European.

Holcus, L. Meadow Soft-Grass.  
H. lanatus, L. (Velvet-Grass.) European.
CATALOGUE OF PLANTS.

Deschampsia, Beauv. Hair-Grass.
D. flexuosa, Trin. (Aira flexuosa, L.)—(Common Hair-Grass.) Dry places.
D. caespitosa, Beauv. (Aira caespitosa, L.)—(Tufted Hair-Grass.) Shores of Conn. river, etc.

Avena, Tourn. Oat-Grass.
A. striata, Michx. Rocky hillsides; frequent.
[A. SATIVA, L. (Cultivated Oat.)]

Danthonia, DC. Oat-Grass. White-Grass.
D. spicata, Beauv. Dry and poor soil; hillside pastures, etc.; common.
Sometimes called "June Grass," a name that belongs to Poa pratensis (Kentucky Blue-Grass).

Eatonia, Raf.
E. Pennsylvanica, Gray. Moist woods and rocks; frequent.

Eragrostis, Beauv.
E. capillaris, Nees. Sandy soil; common.
E. pectinacea, Gray. Dry, sandy fields; rare.

Dactylis, L. Orchard-Grass.
D. GLOMERATA, L. Very common; European.

Poa, L. Meadow-Grass. Spear-Grass.
P. ANNUA, L. (Low Spear-Grass.) Cultivated grounds; everywhere; naturalized from Europe.
P. COMPRESSA, L. (Wire-Grass.) Dry, sterile soil; European and very common.
P. nemoralis, L. (P. caesia, Smith.) Thetford, Vt., Dr. Blanchard; rare.
P. serotina, Ehrh. (Fowl Meadow-Grass.) Wet meadows, and valuable.
P. pratensis, L. (June Grass. Kentucky Blue-Grass.) Common, and of value.
P. TRIVIALIS, L. (Roughish Meadow-Grass.) In wet meadows; European, and not very common.
P. alsodes, Gray. Hillside woods, Dr. Barrows. Rare.

Glyceria, R. Br. Manna-Grass.
G. Canadensis, Trin. (Rattlesnake-Grass.) Wet places; very common.
G. elongata, Trin. Wet woods; rare.
G. nervata, Trin. Wet places; common.
G. pallida, Trin. Shallow water.
G. grandis, Watson. (G. aquatica of Am. authors; G. arundinacea, Kth.)—(Reed Meadow-Grass.) Common in marshes.
G. fluitans, R. Br. Floating in shallow water.

Festuca, L. Fescue-Grass.
F. tenella, Willd. Sterile soil; not common.
F. ovina, L. (Sheep's Fescue.) Forms tufts in meadows, and varies greatly.
F. nutans, Willd. (Nodding Fescue.) Frequent in rocky woods.
F. ELATIOR, L. (Meadow Fescue.) A very useful grass; common in cultivation; from Europe.
Bromus, L. Brome-Grass.
B. Kalmii, Gray. (Wild Chess.) Borders of woodlands.
B. secalinus, L. (Chess or Cheat.) Grain fields; a pernicious European weed, but not very common.
B. ciliatus, L. Borders of woods; common and variable.

Lolium, L. Darnel.
L. perenne, L. (Common Darnel. Italian Rye-Grass.) Fields; a valuable European grass.
[Lolium temulentum, L. (Poison Darnel), also European, whose seeds are reputed to be poisonous, may yet be found in grain fields.]

Agropyrum, Gaertn.
A. repens, Beauv. (Triticum repens. L.)—(Couch or Witch-Grass.) Everywhere common and variable.

Elymus, L. Wild Rye.
E. Virginicus, L. River-banks; common.
E. Canadensis, L. River-banks; common.
E. striatus, Willd. Rocky woods; and like the above somewhat variable

A. Hystrix, Willd. (Gymnostichum Hystrix, Schreb.) Woods; common.

[There belong also to this Order, TRITICUM VULGARE (Wheat), SECALE CEREALE (Rye), HORDEUM VULGARE (Barley), and ZEA MAYS (Maize, Indian Corn), each including many varieties. In addition, many foreign Grasses are cultivated for ornamental purposes.]
SERIES 2.

CRYPTOGAMOUS OR FLOWERLESS PLANTS.

CLASS III. ACROGENS.

E. arvense, L. (Common Horsetail.) Moist, especially gravelly soil; very common.
E. sylvaticum, L. (Wood Horsetail.) Wet shady places; common.
E. limosum, L. (Marsh Horsetail.) In shallow water; common.
E. hyemale, L. (Scouring Rush.) Wet, sandy banks; very common.
E. scirpoides, Michx. Wooded hillsides; common.

Order 98. Filices. Ferns.

Polypodium, L. Polypody.
P. vulgare, L. On rocks in woods; common.

Adiantum, L. Maidenhair Fern.
A. pedatum, L. Rich, moist woods; common.

Pteris, L. Brake.
P. aquilina, L. (Common Brake.) Pastures and woods; everywhere.

Pellaea, Link. Cliff-Brake.

Asplenium, L. Spleenwort.
A. Trichomanes, L. Shaded rocks; common.
A. ebeneum, Ait. Rocky woods; common.
A. thelypteroides, Michx. Rich woods; common.
A. Filix-fœmina, Bernh. (Lady-Fern.) Frequent and variable.
CATALOGUE OF PLANTS.

**Camptosorus**, Link. Walking-Leaf.
C. rhizophyllus, Link. On shaded rocks; very local. Lebanon, N. H., Dr. Barrows; Windsor, Vt., Leland; Norwich, Vt., Miss Loveland.

P. polypodioides, Fée. Damp woods; common.
P. Dryopteris, Fée. Rocky woods; common.

**Aspidium**, Swartz. Shield Fern.
A. Thelypteris, Swartz. Marshes; abundant.
A. Noveboracense, Swartz. Wet woods; abundant.
A. spinulosum, Swartz. Damp woods. This is the European type, and is rare.
\[\text{var. intermedium, Gray. Common.}\]
\[\text{var. dilatatum, Gray. Summit of Mt. Ascutney, Vt., Leland; Killington Mt., Denslow.}\]
A. cristatum, Swartz. Swamps; common.
\[\text{var. Clintonianum, D. C. Eaton. Hanover, N. H., Miss Hitchcock; and probably not very rare.}\]
A. marginale, Swartz. Rocky hillsides, etc.; abundant.
A. acrostichoides, Swartz. (Christmas Fern.) Woods; common and variable.

**Cystopteris**, Bernh. Bladder Fern.
C. fragilis, Bernh. Shaded ravines; very common.
C. bulbifera, Bernh. Moist cliffs and rich woods; frequent.

**Onoclea**, L.
O. sensibilis, L. (Sensitive Fern.) Very common.
O. Struthiopteris, Hoff. (Struthiopteris Germanica, Willd.)—(Ostrich Fern.) Rich alluvial soil; abundant.

**Woodsia**, R. Br.
W. Ilvensis, R. Br. On rocks; common.
W. obtusa, Torrey. Rocky banks; rather rare.

**Dicksonia**, L’Her.

**Osmunda**, L. Flowering Fern.
O. regalis, L. (Queen-Fern. Royal-Fern.) Wet woods; rather common.
O. Claytoniana, L. (Clayton’s Fern.) Wet woods; very common.
O. cinnamomea, L. (Cinnamon Fern.) Wet woods; common.
Order 99. OPHIOGLOSSACEÆ. Adder’s-Tongue Family.

B. simplex, Hitch. Hillside pastures; very seldom met with.
B. lanceolatum, Angs. Hillside pastures with the preceding two species, and like them very rarely collected.
B. ternatum, Swartz. Pastures and hillsides. Among the numerous varieties described by Prof. D. C. Eaton, the more common are:
   var. intermedium. A large form.
   var. obliquum. Medium in size and more common.
   var. dissectum. Occasionally with the last. See Eaton’s Ferns of North America.
B. Virginianum, Swartz. Rich woods; common.

Ophioglossum, L. Adder’s-Tongue.
O. vulgatum, L. Bogs and pastures; not uncommon.

Order 100. LYCOPodiACEÆ. Club-Moss Family.

Lycopodium, L. Club-Moss.
L. lucidulum, Michx. Damp woods; common.
L. inundatum, L. Clayey ground; Grantham Mt., Plymouth, and Hanover, N. H.; Hartland, Vt.; etc.; scarce.
L. annotinum, L. Woods; common.
L. obscurum, L. Seldom distinguished from the variety.
   var. dendroidium. (L. dendroidium, Michx.)—(Tree Club-Moss.)
   Woods; common.
L. clavatum, L. (Common Club-Moss.) Dry woods; abundant.
L. complanatum, L. (Creeping Ground-Pine.) With the above, common.
   var. chamaecyparissus, Eaton. Occasional.

Order 101. SELAGINELLACEÆ. Selaginella Family.

Selaginella, Beauv.
S. rupestris, Spring. Dry rocks; common.
S. apus, Spring. Wet places; about springs; much less common.

Isoetes, L. Quillwort.
I. echinospora, Durieu. The type form is European, but the following varieties are met with:
   var. Braunii, Engel. Margin of ponds and streams.
   var. muricata, Engel. Mouth of Pompanosuc river, Norwich, Vt.
   var. Bootii, Engel. Goose Pond, Canaan; Conn. river, Hanover.
I. riparia, Engel. Margin of Conn. river, Hanover.
[I. lacustris, L. Assigned to “Lebanon” in the Geological Survey of New Hampshire. The species referred to is probably some var. of I. echinospora; but if I. lacustris is a New England species, it should be found within our limits. Apparently very little is known about it.]
[All the members of this genus are of somewhat uncertain determination. They are found in our springs and ponds, and in the still and shallow margins of our streams, or during a period of drought may be entirely out of the water.]
LIST OF VERTEBRATES.¹

(BY PROF. T. W. D. WORTHEN.)

CLASS I. PISCES. THE FISHES.

Order I. NEMATOGNATHI.

Family 1. SILURIDÆ. The Cat-fishes.

Ameiurus, Rafinesque.

Order II. EVENTOGNATHI.

Family 2. CATOSTOMIDÆ. The Suckers.

Catostomus, Le Sueur. Fine-scaled Suckers.

Family 3. CYPRINIDÆ. The Minnows.

Notropis, Rafinesque. American Minnows.

Rhinichthys, Agassiz.

Semotilus, Rafinesque.

Notemigonus, Rafinesque.

¹ In this list are included, so far as known, all Animals belonging to the Sub-Kingdom Vertebrata, found within about thirty miles of Hanover, N. H. The classification, including citation of authorities, is that given in the Manual of the Vertebrate Animals of the Northern United States by Pres. David S. Jordan, Fifth edition, rewritten and enlarged, 1888, where full descriptions may be found.
LIST OF VERTEBRATES.

Order III. ISOSPONDYLI. The Salmon, Herring, etc.

Family 4. SALMONIDÆ. The Salmon.

Salvelinus (Nilsson), Richardson.

Order IV. HAPLOMII. The Pike-like Fishes.

Family 5. ESOCIDÆ. The Pikes.

Esox (Artegi), Linnæus.

Order V. APODES. The Eels.

Family 6. ANGUILLIDÆ. The True Eels.

Anguilla, Thunberg.

Order VI. ACANTHOPTERI. The Spiny-rayed Fishes.

Family 7. CENTRARCHIDÆ. The Sun-fishes.

Lepomis, Rafinesque. Sun-fishes.

Family 8. PERCIDÆ. The Perches.

Etheostoma, Rafinesque. Darters.
Perca (Artedii), Linnæus.
Stizostedion, Rafinesque.

Family 9. COTTIDÆ. The Sculpins.

Cottus (Artedii) Linnæus. Miller's Thumb.

Family 10. GADIDÆ. The Cod-fishes.

L. lota (L.), var. maculosa, Le Seur. Eel Pout. Common.
CLASS II. BATRACHIA. THE BATRACHIANS.

ORDER VII. URODELA. THE SALAMANDERS.

FAMILY II. AMBLYSTOMATIDÆ. THE BLUNT-NOSED SALAMANDERS.

Amblystoma, Tschudi.
A. tigrinum (Green). Not rare.

FAMILY 12. PLETHODONTIDÆ.

Plethodon, Tschudi.
P. erythronotus (Green). Common.
P. glutinosus (Green). Not rare.

Spelerpes, Rafinesque.
S. bilineatus (Green). Not rare.
S. longicauda (Green). Cave Salamander. Rare.
S. ruber (Daudin). Common.

FAMILY 13. PLEURODELIDÆ. THE NEWTS.

Diemyctylus, Rafinesque.

ORDER VIII. SALIENTIA. THE TAILLESS BATRACHIANS.

FAMILY 14. BUFONIDÆ. THE TOADS.

Bufo, Laurenti.

FAMILY 15. PELOBATIDÆ. THE BURROWING TOADS.

Scaphiopus, Holbrook.

FAMILY 16. HYLIDÆ. THE TREE FROGS.

Acris, Dumeril & Bibron.
A. gryllus, Le Conte. Cricket Frog. Probable.
Chorophilus, Baird.

Hyla, Laurenti.
H. versicolor, Le Conte. Common Tree Toad. Common.

Family 17. Ranidae. The Frogs.

Rana, Linnaeus.
R. palustris, Le Conte. Pickerel Frog. Rather common.
R. sylvatica, Le Conte. Wood Frog. Rather common.
CLASS III. REPTILIA. THE REPTILES.

Order IX. OPHIDIA. The Serpents.

Family 18. COLUBRIDÆ. The Colubrine Snakes.

Storeria, Baird & Girard.

Eutainia, Baird & Girard. Garter Snakes.
var. ordinata (L.). Common.
var. dorsalis (Baird & Girard). Common.

Tropidonotus, Kuhl.

Liopeltis (Fitzinger), Cope.

Diadophis, Baird & Girard.

Ophibolus, Baird & Girard.

Heterodon, Beauvais.

Family 19. CROTALIDÆ. The Rattlesnakes.

Crotalus, Linnaeus.

Order X. TESTUDINATA. The Turtles.

Family 20. CHELYDRIDÆ. The Snapping Turtles.

Chelydra, Schweigger.
LIST OF VETERBRATES.

Family 21. **EMYDIDÆ.** **The Pond Turtles.**

**Chrysemys,** Gray.

**Chelopus,** Rafinesque.
  C. insculptus (Le Conte). Wood Tortoise. Not common.
  C. guttatus (Schneider). Speckled Tortoise. Probable.
CLASS IV. AVES. THE BIRDS.

Order XI. PYGOPODES. THE DIVING BIRDS.

Family 22. PODICIPIDÆ. THE GREBES.

Podiceps, Latham.

Colymbus, Linnaeus.

Podilymbus, Lesson.

Family 23. URINATORIDÆ. THE LOONS.

Urinator, Cuvier.

Family 24. ALCIDÆ. THE AUKS.

Alle, Link.

Order XII. LONGIPENNES. THE LONG-WINGED SWIMMERS.

Family 25. LARIDÆ. THE GULLS.

Larus, Linnaeus.

Sterna, Linnaeus.
S. Antillarum, Lesson. Least Tern. Rare summer visitor.

Family 26. PHALACROCORACIDÆ. THE CORMORANTS.

Phalacrocorax, Brisson.
LIST OF VERTEBRATES.

Order XIII. ANSERES. The Ducks and Geese.

Family 27. ANATIDÆ. The Ducks and Geese.

Merganser, Brisson.

Lophodytes, Reichenbach.
M. V. E. Knox.

Anas, Linnaeus.
A. discors, L. Blue-winged Teal. Migrant.

Aix, Boie.

Erismatura, Bonaparte.

Branta, Scopoli.

Order XIV. HERODIONES. The Herons and Storks.

Family 28. ARDEIDÆ. The Herons.

Botaurus, Stephens.

Ardea, Linnaeus.
A. herodias, L. Great Blue Heron. Rather common summer resident.
A. virescens (L.). Green Heron. Rather common summer resident.

Nycticorax, Stephens.

Order XV. PALUDICOLÆ. The Cranes and Rails.

Family 29. RALLIDÆ. The Rails.

Rallus, Linnaeus.
R. Virginianus, L. Virginia Rail. Probable summer resident.
LIST OF VERTEBRATES.

Porzana, Vieillot.
    R. Chellis.

Fulica, Linnaeus.
  F. Americana (Gmelin). Coot. Mud Hen. Rather rare summer resident.

ORDER XVI. LIMICOLÆ. THE SHORE-BIRDS.

FAMILY 30. SCOLOPACIDÆ. THE SNIPE.

Philohela, Gray.
  P. minor (Gmelin). American Woodcock. Common migrant; not rare summer resident.

Gallinago, Leach.

Tringa, Linnaeus.

Totanus, Bechstein.

Bartramia, Lesson.
  B. longicauda (Bechstein). Upland Sandpiper. Rather common summer resident.

Actitis, Boie.

FAMILY 31. CHARADRIIDÆ. THE PLOVERS.

Ægialitis, Boie.
  Æ. vocifera (L.). Kildeer. Rare summer visitor.  B. T. Blanpied.

Arenaria, Brisson.

ORDER XVII. GALLINÆ. THE GALLINACEOUS BIRDS.

FAMILY 32. TETRAONIDÆ. THE GROUSE.

Colinus, Lesson.
  C. Virginianus (L.). Bob-White. Quail. Rare summer visitor or resident.  T. H. Chubb;  B. T. Blanpied.
LIST OF VERTEBRATES.

Dendragapus, Elliott.

Bonasa, Stephens.

Order XVIII. COLUMBÆ. The Doves.

Family 33. COLUMBIDÆ. The Pigeons.

Ectopistes, Swainson.

Zenaidura, Bonaparte.

Order XIX. RAPTORES. The Birds of Prey.

Family 34. FALCONIDÆ. The Falcons.

Circus, Lacépède.

Accipiter, Brisson.
A. Cooperi, Bonaparte. Chicken Hawk. Common summer resident.
A. atricapillus (Wilson). Goshawk. Rather rare winter visitor and rare resident.

Buteo, Cuvier.
B. lineatus (Gmelin). Chicken Hawk. Red-Shouldered Hawk. Rather common resident.

Archibuteo, Brehm.

Aquila, Brisson.

Haliaëtus, Savigny.
H. leucocephalus (L.). Bald Eagle. Rather rare summer resident.

Falco, Linnaeus. Falcons.
LIST OF VERTEBRATES.

F. columbarius, L. Pigeon Hawk. American Merlin. Rather common summer resident and rare resident.
F. sparverius, L. Sparrow Hawk. Rusty Crowned Falcon. Rather common summer resident.

_Pandion_, Savigny.
P. haliaëtus (L.). Osprey. Fish Hawk. Rather common summer resident.

**Family 35. BUBONIDÆ. The Owls.**

_Asio_, Brisson.
A. Wilsonianus (Lesson). Long-eared Owl. Rare resident. _T. Bakes._

_Syrnium_, Savigny.
S. nebulosum (Forster). Barred Owl. Rather common resident.

_Scotiaptex_, Swainson.

_Nyctala_, Brehm.
N. Tengmalmii (Gmelin). Sparrow Owl. Probable winter visitor.

_Megascops_, Kaup.

_Bubo_, Duméril.
B. Virginianus (Gmelin). Great Horned Owl. Not rare resident.

_Nyctea_, Stephens.

_Surnia_, Duméril.
S. ulula (L.). Hawk Owl. Day Owl. Rare winter visitor or resident.

**Order XX. COCCYGES. The Cuckoo-like Birds.**

**Family 36. CUCULIDÆ, The Cuckoos.**

_Coccyzus_, Vieillot.
C. Americanus (L.). Yellow-billed Cuckoo. “Rain Crow.” Rather common summer resident,

**Family 37. ALCEDINIDÆ. The Kingfishers.**

_Cerule_, Boie.
Order XXI. PICI. The Woodpeckers and Wrynecks.

Family 38. PICIDÆ. The Woodpeckers.

Dryobates, Boie.

Picoides, Lacépède.
P. arcticus (Swainson). Black-backed Woodpecker. Not common winter resident.

Sphyrapicus, Baird.

Ceophylæus, Cabanis.

Melanerpes, Swainson.
M. Carolinus (L.). Red-bellied Woodpecker. Possible summer resident.

Colaptes, Swainson.

Order XXII. MACROCHIRES. The Swifts and Humming Birds.

Family 39. CAPRIMULGIDÆ. The Goatsuckers.

Antrostomus, Gould.

Chordeiles, Swainson.

Family 40. MICROPOLIDÆ. The Swifts.

Chætura, Stephens.

Family 41. TROCHILIDÆ. The Humming Birds.

Trochilus, Linnaeus.
LIST OF VERTEBRATES.

Order XXIII. PASSERES. The Passerine Birds.

Family 42. **Tyrannidae.** The Flycatchers.

**Tyrannus,** Cuvier.

**Myiarchus,** Cabanis.
M. crinitus (L.). Great Crested Flycatcher. Not rare summer resident.

**Sayornis,** Bonaparte.

**Contopus,** Cabanis.
C. borealis (Swainson). Olive-sided Flycatcher. Rather rare summer resi-
dent.

**Empidonax,** Cabanis.
E. flaviventer, Baird. Yellow-bellied Flycatcher. Not common summer resi-
dent.
E. Acadiacus (Gmelin). Small Green-crested Flycatcher. Not rare sum-
mer resident.
E. pusillus (Swainson), var. Trailli, Audubon. Traill’s Flycatcher. Not
common summer resident.

Family 43. **Alaudidae.** The Larks.

**Otocoris,** Bonaparte.
G. D. Hull.

Family 44. **Corvidae.** The Crows and Jays.

**Cyanocitta,** Strickland.

**Perisoreus,** Bonaparte.
visitor; possible resident. Storrs.

**Corvus,** Linnaeus.

Family 45. **Icteridae.** The American “Orioles” and “Black-
birds.”

**Dolichonoryx,** Swainson.
summer resident.

**Molothrus,** Swainson.
M. ater (Boddaert). Cow Blackbird. Cowbird. Common summer resi-
dent.
Agelaius, Vieillot.  

Sturnella, Vieillot.  

Icterus, Brisson.  

Scolecophagus, Swainson.  

Quiscalus, Vieillot.  

Family 46. Fringillidae. The Finches.

Pinicola, Vieillot.  
P. enucleator (L.). Pine Grosbeak. Rather common winter resident.

Carpodacus, Kaup.  
C. purpureus (Gmelin). Purple Finch. Very common summer resident.

Loxia, Linnaeus.  
L. curvirostra (L.). Red Crossbill. Not rare winter resident; rare resident.

Acanthis, Bechstein.  
A. linarius (L.). Red Poll Linnet. Rather common winter resident.

Spinus, Boie.  

Plectrophenax, Stejneger.  
P. nivalis (L.). Snow Bunting. Very common winter resident.

Calcarius, Bechstein.  
C. Lapponicus (L.). Lapland Longspur. Rare winter visitor.

Poocætes, Baird.  

Passer, Brisson.  
P. domesticus (L.). English Sparrow. Abundant resident.

Ammodyramus, Swainson.  
A. Sandwichensis (Gmelin), var. Savanna. Savanna Sparrow. Not common summer resident.
A. savannarum (Gmelin). Grasshopper Sparrow. Probable summer resident.

Zonotrichia, Swainson.

Spizella, Bonaparte.
S. monticola (Gmelin). Tree Sparrow. Rather rare winter visitor.

Junco, Wagler.

Melospiza, Baird.
M. fasciata (Gmelin). Song Sparrow. Very common summer resident.
M. Georgiana (Latham). Swamp Sparrow. Rather common summer resident.

Passerella, Swainson.

Pipilo, Vieillot.

Habia, Reichenbach.
H. Ludoviciana (L.). Rose-breasted Grosbeak. Rather common summer resident.

Passerina, Vieillot.
P. cyanea (L.). Indigo Bird. Very common summer resident.

Family 47. TANAGRIDÆ. The Tanagers.

Piranga, Vieillot.
P. erythromelas, Vieillot. Scarlet Tanager. Rather common summer resident.

Family 48. HIRUNDINIDÆ. The Swallows.

Progne, Boie.
P. subis (L.). Purple Martin. Rather common summer resident.

Petrochelidon, Cabanis.
P. lunifrons (Say). Cliff Swallow. Abundant summer resident.

Chelidon, Forster.
C. erythrogaster (Boddaert). Barn Swallow. Abundant summer resident.

Tachycineta, Cabanis.
Clivicola, Forster.

Family 49. Ampelidae. The Chatterers.

Ampelis, Linnaeus.

Family 50. Laniidae. The Shrikes.

Lanius, Linnaeus.
L. Ludovicianus, L. Logger-head Shrike. Rather rare resident.

Family 51. Vireonidae. The Vireos.

Vireo, Vieillot.
V. gilvus (Vieillot). Warbling Vireo. Rather common summer resident.
V. flavifrons, Vieillot. Yellow-throated Vireo. Not rare summer resident.
V. solitarius (Wilson). Blue-headed Vireo. Rather rare summer resident.
V. Noveboracensis (Gmelin). White-eyed Vireo. Rather common summer resident.

Mniotilta, Vieillot.
M. varia (L.). Black and White Creeper. Rather common summer resident.

Helminthophila, Ridgway.
H. chrysoptera (L.) Golden-winged Warbler. Probable migrant and resident.
H. pinus (L.). Blue-winged Yellow Warbler. Possible summer resident.
H. peregrina (Wilson). Tennessee Warbler. Rare migrant, and possible resident.
H. celata (Say). Orange-crowned Warbler. Rare summer resident. F. H. Herrick.
LIST OF VERTEBRATES.

Compsothlypis, Cabanis.
C. Americana (L.). Blue Yellow-backed Warbler. Not common summer resident.

Dendroica, Gray.
D. coronata (L.) Yellow-rumped Warbler. Common migrant and probable resident.
D. maculosa (Gmelin). Black and Yellow Warbler. Not rare summer resident.
D. castanea (Wilson). Bay-breasted Warbler. Autumn Warbler. Rare summer resident.
D. Blackburniæ (Gmelin). Orange-throated Warbler. Blackburnian Warbler. Rare summer resident.
D. virens (Gmelin). Black-throated Green Warbler. Rather common summer resident.
D. discolor (Vieillot). Prairie Warbler. Probable summer resident.
D. palmarum (Gmelin). Red-poll Warbler. Rather common migrant.

Seiurus, Swainson.
S. Noveboracensis (Gmelin). Water Wagtail. Water Thrush. Probable summer resident.

Geothlypis, Cabanis.
G. Philadelphia (Wilson). Mourning Warbler. Rare summer resident.
G. trichas (L.) Maryland Yellow Throat. Common summer resident.

Sylivia, Nuttall.

Setophaga, Swainson.
S. ruticilla (L.). American Redstart. Rather common summer resident.

Family 53: MOTACILLIDÆ. The Wagtails.

Anthus, Bechstein.
LIST OF VERTEBRATES.

Family 54. TROGLODYTIDÆ. The Wrens and Mocking-Birds.

Mimus, Boie.

Galeoscoptes, Cabanis.

Harpornynchus, Cabanis.

Troglodytes, Vieillot.

Family 55. CERTHIIDÆ. The Creepers.

Certhia, Linnaeus.
C. familiaris, L. Brown Creeper. Rather rare summer resident.

Family 56. PARIDÆ. The Nuthatches and Titmice.

Sitta, Linnaeus.

Parus, Linnaeus.

Family 57. SYLVIIDÆ. The Old World Warblers.

Regulus, Cuvier.

Family 58. TURDIDÆ. The Thrushes.

Turdus, Linnaeus.
T. mustelinus, Gmelin. Wood Thrush. Rare summer resident.
T. ustulatus, Nuttall. Olive-backed Thrush. Rare summer resident.

**Merula**, Leach.

**Sialia**, Swainson.

CLASS V. MAMMALIA. THE MAMMALS.

Order XXIV. GLIRES. The Rodents or Gnawers.

Family 59. LEPORIDÆ. The Hares.

Lepus, Linnaeus.

Family 60. HYSTRICIDÆ. The Porcupines.

Erethizon, Frédéric Cuvier.
E. dorsatus (L.). Canada Porcupine. Not rare. This is wrongly called "Hedgehog", which is European.

Family 61. ZAPODIDÆ. The Jumping Mice.

Zapus, Coues.
Z. Hudsonius (Zimmerman). Jumping Mouse. Rare.

Family 62. MURIDÆ. The Mice.

Fiber, Cuvier.

Arvicolæ, Lacépède. Field Mice.

Evotomys, Coues.
E. rutilus (Pallas). Long-eared Mouse. Rather rare.

Calomys, Waterhouse.

Mus, Linnaeus. Old World Rats and Mice.
M. decumanus, Pallas. Brown or Norway Rat. Abundant.
M. rattus, L. Black Rat. Common.
M. musculus, L. Common House Mouse. Too abundant.

Family 63. CASTORIDÆ. The Beavers.

Castor, Linnaeus.
LIST OF VERTEBRATES.

Family 64. **SCIURIDÆ.** The Squirrels.

*Arctomys*, Schreber.

*Tamias*, Illiger.

*Sciurus*, Linnaeus.
S. Carolinensis, Gmelin. Includes,—Gray Squirrel, common; Black Squirrel, very rare.

*Sciuropterus*, Frédéric Cuvier.

Order XXV. **INSECTIVORA.** The Insect-eaters.

Family 65. **SORICIDÆ.** The Shrews.

*Sorex*, Linnaeus.
S. Forsteri (Richardson). Probable.

*Blarina*, Gray.
B. angusticeps, Baird. Not rare.

Family 66. **TALPIDÆ.** The Moles.

*Scalops*, Cuvier,

*Scapanus*, Pomel.

*Condylura*, Illiger.

Order XXVI. **CHEIROPTERA.** The Bats.

Family 67. **VESPERTILIONIDÆ.** The Common Bats.

*Vespertilio*, Linnaeus.

*Vesperugo*, Keyserling & Blasius.
V. Georgianus (F. Cuvier). Rare.
V. serotinus (Schreber), var. fuscus, Beauvais. Long-eared Bat. Rare.

*Atalapha*, Rafinesque.
A. cinerea (Beauvais). Hoary Bat. Possible.
LIST OF VERTEBRATES.

Order XXVII. UNGULATA. The Hoofed Mammals.

Family 68. Cervidae. The Deer.

Cariacus, Gray.
C. Virginianus (Boddart). Virginia Deer. Red Deer. Rare. Has been reintroduced into Vermont, and may be seen occasionally throughout the district.

Order XXVIII. Ferae. The Flesh-Eaters or Carnivora.

Family 69. Procyonidae. The Raccoons.

Procyon, Storr.

Family 70. Ursidae. The Bears.

Ursus, Linnaeus.
U. Americanus, Pallas. Brown, Black, or Cinnamon Bear. Rare.

Mephitis, Cuvier.
M. mephita (Shaw). Common Skunk. Too common.

Gulo, Storr.

Mustela, Linnaeus.
M. Pennanti (Erxleben). Black Cat. Rare.

Putorius, Cuvier.
P. vison (Schreber). Mink. Rather common.
P. nivalis (L.). Least Weasel. Rare.

Family 72. Canidae. The Dogs.

Vulpes, Brisson.
V. vulpes (L.). Red Fox. Rather common.
var. decussatus, Desm. The Cross Fox. Very rare.
var. argentatus, Shaw. Black or Silver Fox. Very rare.

Family 73. Felidae. The Cats.

Lynx, Rafinesque.
L. Canadensis (Desmarest). Canada Lynx. Rare.
L. rufus (Guldenstadt). American Wild Cat. Rare.

Felis, Linnaeus. Cats.
LIST OF VERTEBRATES.

Order XXIX. PRIMATES. The Anthropoid Mammals.

Family 74. HOMINIDÆ. The Men.

Homo, Linnaeus.

H. sapiens, L. Man.
  var. Americanus, L. "American Indian."
  var. Europæus, L. Caucasian race.
  var. Asiaticus, L. Mongolian race.
  var. Afer, L. Negro race.

SUMMARY OF SPECIES.

</tr>
</tbody>
</table>

Note.—The above List, it is hoped, will furnish a good working basis for a thorough exploration of the region designated, and ultimately for a complete Catalogue of the Vertebrates occurring within our limits. The coöperation of all naturalists and sportsmen is invited, and they are requested to report all additions, corrections, and information of any kind, to either Prof. T. W. D. Worthen or Prof. H. G. Jesup, Hanover, N. H.
### INDEX TO PLANTS.
